SA Consulting Endpoint Management implementation services

Enable users to be productive, on any device, without compromising IT security

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop & implementation service will show you how to manage both company-owned and user-chosen devices in the cloud.

How Signal Alliance Consulting can help you in your journey:

Available services depending on your needs and readiness

Planning & Assessment

- kick-off meeting introducing the Endpoint Management Workshop engagement, discuss the upcoming activities, align expectations and establish timelines.
