Microsoft 365 Copilot Envisioning Workshop

Get ready for a whole new way to work with Microsoft Copilot

Microsoft 365 Copilot is an upcoming AI-powered feature that promises to deliver tailored insights and intelligent suggestions, transforming your everyday tasks into opportunities for growth and innovation. By integrating large language models (LLMs) with tenant data from Microsoft Graph and the Microsoft 365 apps, Copilot helps turn natural language words into a powerful productivity tool. SA Consulting's Microsoft 365 Copilot Envisioning offering is a 1-hour workshop that is designed to provide a jumpstart to integrate Copilot across your enterprise and increase the power of Microsoft 365 productivity.

How Signal Alliance Consulting can help you in your journey:

Available services depending on your needs and readiness

Approach & Deliverables

SA Consulting will dive into how Copilot can be used with Microsoft 365 including, but not limited to

- Microsoft 365 Apps (PowerPoint, Word, Excel)
- Exchange Online
- SharePoint Online
- OneDrive for Business
- Microsoft Teams

Our approach will also discuss the need to address certain Information Governance components when leveraging Copilot like:

- Data Loss Prevention.
- Retention
- Classification/Labelling
- Insider Risk Management
- External Sharing and Identities
- Access Management

The capabilities of Copilot allow your organization to maximize the business value of the Microsoft 365 solutions, increase productivity, and increase the ability to find and leverage the information that is needed to conduct business.

Expected Outcomes

- The result of the Envisioning session is a better understanding of "Art of the Possible" while addressing the needed controls that should be in place to keep corporate data safe and secured..
- High-level training plan for Microsoft 365 tools and use cases
- Increased ROI on core collaboration apps
