# Simple, Secure and Legal Digital Signatures

Digital business is a necessity today. Most other esignature solution come with inadequate evidence, security and consumer consent. Ensure your business goes digital in a compliant way with power of secure digital signatures, that use - geotagging, IP based checks, time stamping, crypto storage and also optional quick video verification of the signee, for increased evidence.

All this data is then available in an easy to retrieve audit certificate which is tamper proof and can be shown as evidence anywhere. Consent trail is also stored and available to prove compliance to both regulatory and privacy laws.
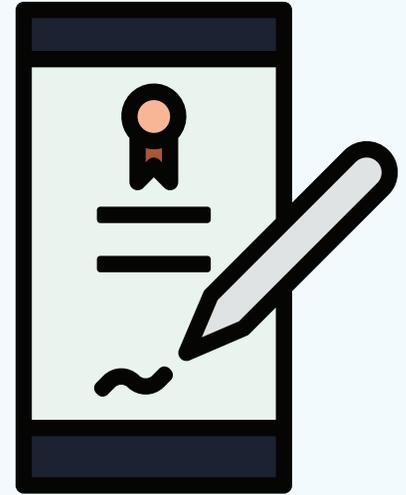

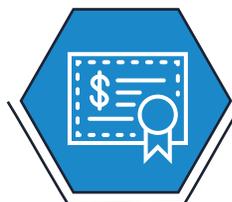

Use our Digital Signature services for

Wide range of Applications

Lending Contracts

Insurance Contracts

Travel ID verifications

Investment Documents

Multiparty Contracts

Our Features

User Friendly
User can complete the journey in 25 seconds

Privacy
Contract Information is stored as hash and hence confidential information is always protected. Other such measures ensure Signzy system meets strictest requirements under GDPR and Indian Privacy laws

Secure
Bank grade security with industry leading end to end SSL encryption. And unique alert mechanism that notifies the stakeholders as soon as a risky party or transaction occurs

Legal
Workflow and app design developed with input from legal luminaries to ensure compliance with Indian Contract Act and IT Act

Seamless Integration
Integrate faster with existing infrastructure in under 30 mins using developer friendly sandbox

Biometric Capture
Uses advanced AI and computer vision to create proof of presence and consent
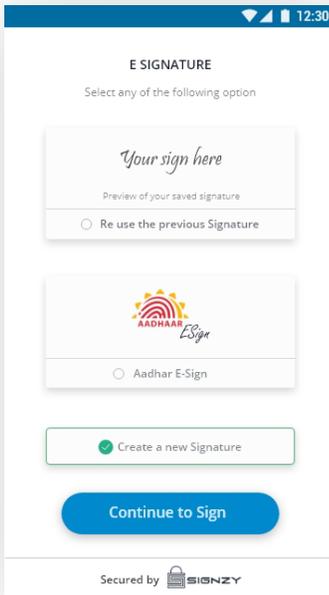

Audit Trail
Detailed audit trail of signee consent containing document hashes, IP, geotag, time-stamp etc. which can be produced as evidence in court

Multi-device compatibility
Runs on mobile apps and supports most modern web browsers
