VENDOR OR CUSTOMER DATA IMPORT FROM GUS WEBSITE

GUS Automatic contractor master data import
Automation of creating a new Vendor or Customer using GUS Website

GUS Data Import for Dynamics 365 is an application created by Sii Polska, which enables data download from the Central Statistical Office (GUS) database to automatically update information when adding customers and suppliers in the Dynamics 365 for Finance and Operations system.

Thanks to the API communication between the Dynamics 365 F&O system and the CSO database, the application allows you to search for information of vendors and customers within ERP system. When creating a new supplier/vendor, a user can fill in NIP (VAT) number.
