

MICROSOFT INTUNE SERVICE

Combining cloud-based management and security features to empower users to be secure and productive on any device, anywhere

Get to know multiple benefits of implementing the tool

Integrated mobile devices and apps management

Intune enables the deployment of multiple app types, including the Microsoft 365 suite and provides one console for complete management of all device types: Android, iOS/iPadOS, macOS, and Windows 10. We will show you how with its help to:

- Automate enrollment options for all corporate devices
- Deploy device security policy settings, restriction policies and feature settings
- Install mandatory apps
- Get remote assistance and audit of any device

Simplified device onboarding

In Microsoft Intune, an automated and zero-touch enrollment method is available for all operating systems: Windows Autopilot, iOS Apple Business Manager, and Android Enterprise. We will explain how by utilizing deployment automation you can reduce IT effort, facilitate user self-enrollment, and enhance user productivity quicker than before.

Secure data and applications

Intune safeguards company data across PCs, phones, and tablets, helping you maintain control over corporate data and apps on personal devices. Our experts will present its functionalities allowing you to:

- Restrict access to corporate resources
- Monitor device and app compliance
- Protect data by regulating certain actions outside of managed app ecosystem
- Prevent data leaks if a device is stolen

See how Sii can simplify management of your mobile devices with Intune

- Intune is a cloud-based service that focuses on mobile device management (MDM) and mobile application management (MAM).
- Intune provides one console for complete management of all device types: Android, iOS/iPadOS, macOS and Windows 10 devices.
- Intune enables deployment of multiple app types, including Microsoft 365 suite.
- Intune integrates with Azure Active Directory (AAD) to control who has access, and what they can access.
- Intune provides secure and controlled access to company data.
