# AI LEGAL ASSISTANT BY SII

Seeking clarity on complex legal matters? Look no further!
We're thrilled to unveil our game-changing AI Legal Assistant,
designed to simplify sophisticated legal issues like never before.

## The promise of AI Legal Assistant

On the wave of technology that drives ChatGPT, we have created an innovative chatbot that operates on authentic legal documents, ensuring unparalleled accuracy and reliability. It offers the ability to verify its answers by referring directly to the source documents on which its knowledge is based.

## The uniqueness of AI-based solution

Our solution utilizes a sophisticated AI search engine that pinpoints content relevant to the query and leverages GPT to use the extracted information to answer in natural language. This significantly minimizes the issue of hallucinations since all responses are based on actual legal texts. Moreover, if the system doesn't know the answer to a question, it refrains from responding (unlike ChatGPT). This approach can also be readily adapted to other domains such as:

### Why customers use AI Legal Assistant:

➢ Easily manage the knowledge by simply adding or removing new documents to the database
