CAF WORKSHOP

Cloud Adoption Framework workshop – Strategy, Planning, Ready, Adopt, Govern and Manage

We will help your organization build the knowledge necessary for the proper implementation of cloud solutions
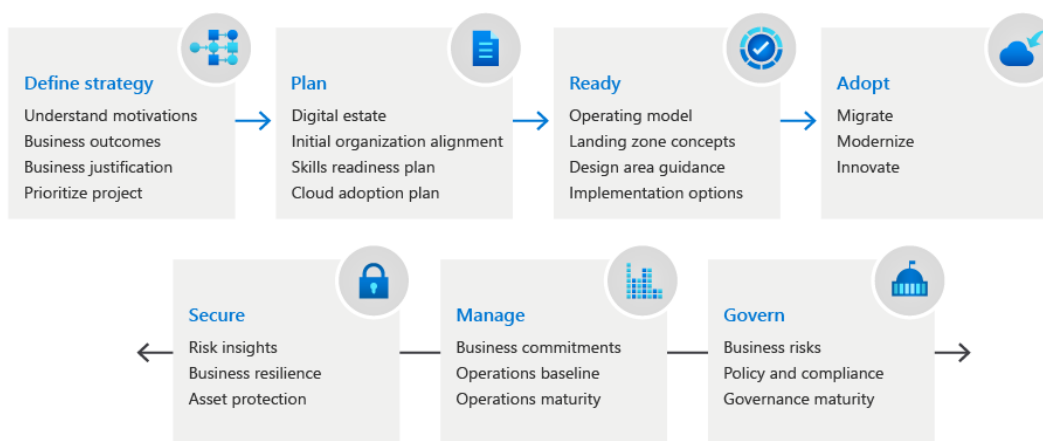

Cloud adoption is a complex process that requires a broader perspective. To be successful, it requires the preparation of solid business assumptions and expected benefits. Microsoft and its partners have prepared a ready-made methodology that consists of the following stages:

- **Strategy** – a stage during which the motivations behind the adoption of the cloud and the business expectations it is to bring are defined.
- **Plan** – the next stage is an inventory of the resources that the organization has - including processes, level of knowledge. Based on these two steps, a basic adoption plan is created.
- **Ready** – this is the stage of preparation for migration to the cloud, where we define the model of work with services, prepare technical requirements and launch the Landing Zone.
- **Adopt** – at this stage we deal with migration and creation of solutions in the cloud, we also modernize the existing ones, because this process is carried out as often as our needs grow.
- **Secure, Manage, Govern** – three stages which are continuous improvement of procedures related to the security, compliance with requirements and standards and service management.
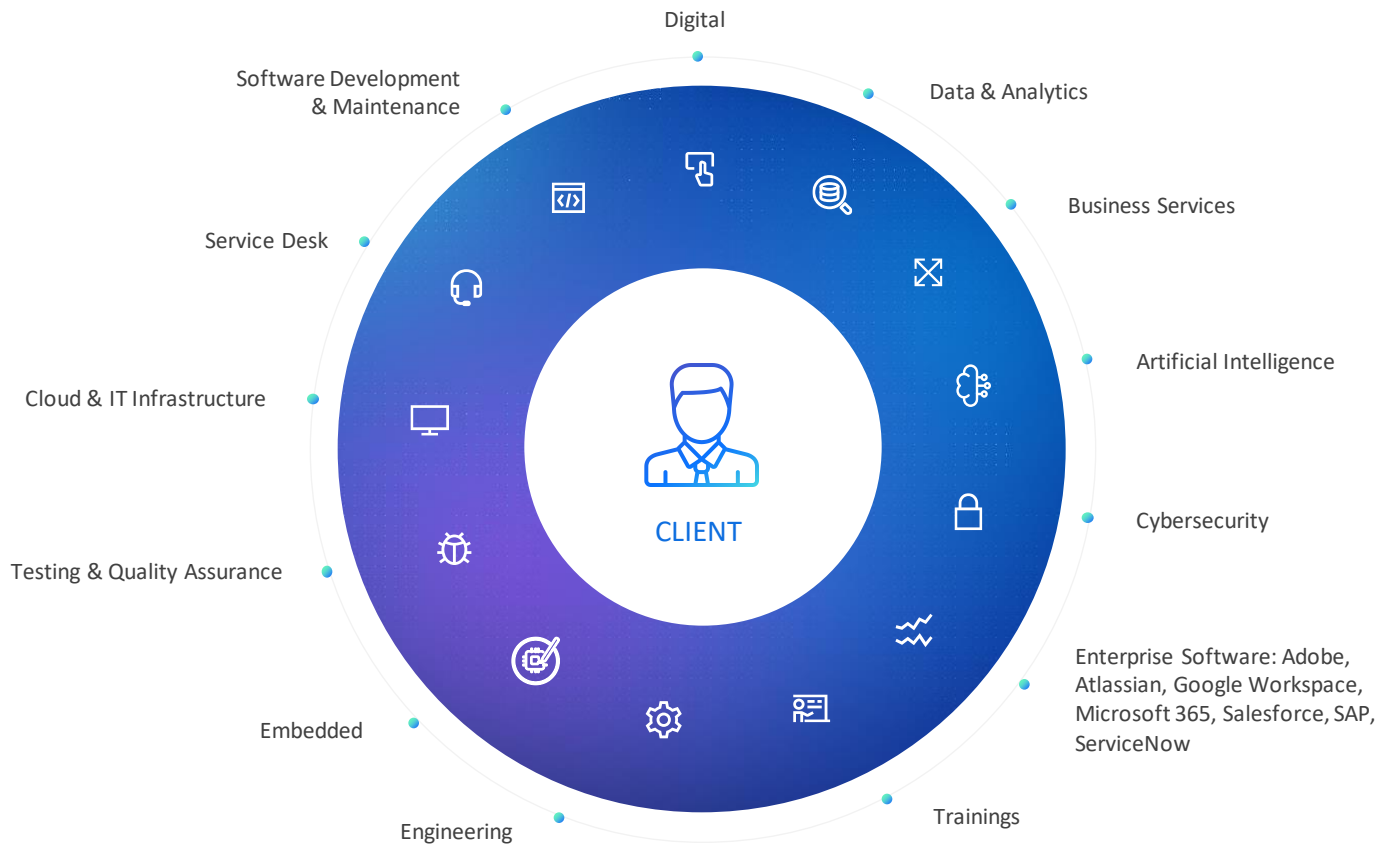

As part of the workshop, we will explain each stage and present the documentation that needs to be prepared.

Why our clients decide to attend a CAF Workshop:

➢ They gain knowledge on how to properly prepare for migration to the cloud

➢ They can identify their motivations for adoption and what benefits they expect from migrating to the cloud

➢ They gain knowledge on how to control their expenses on the cloud, how to forecast expenses

Offer – One-stop shop

The diagram shows CLIENT at the center surrounded by services:
- Digital
- Data & Analytics
- Business Services
- Artificial Intelligence
- Cybersecurity
- Enterprise Software: Adobe, Atlassian, Google Workspace, Microsoft 365, Salesforce, SAP, ServiceNow
- Trainings
- Engineering
- Embedded
- Testing & Quality Assurance
- Cloud & IT Infrastructure
- Service Desk
- Software Development & Maintenance

Tangible Benefits / Desired Outcomes

✓ You take care of your business development - we take care of the cloud

✓ Our architects will support you in the latest technologies

✓ We are ready to maintain your infrastructure with dedicated support team

Why Sii

600 certifed experts

Solution Architects, Network Engineers, Security Engineers, DevOps Architects, Data Engineers, Azure Administrators, Azure Developer, Cybersecurity Artchitects, D365 Consultants, Power BI Analysts

Leading cloud services

Microsoft Azure, Microsoft 365, Dynamics 365, Power Platform

Innovative industry solutions

For manufacturing banking, healthcare, real estate and public sectors

End-to-end Project Support

Mrom preliminary data analysis, target model creation, implementation on dedicated devices to maintenance
