

MICROSOFT AI PRODUCTS WITH SII

At Sii, we offer a range of Microsoft AI products designed to enhance productivity and streamline your work processes. Here's how you can leverage these tools.

What you can choose with Sii to implement Microsoft AI Products?

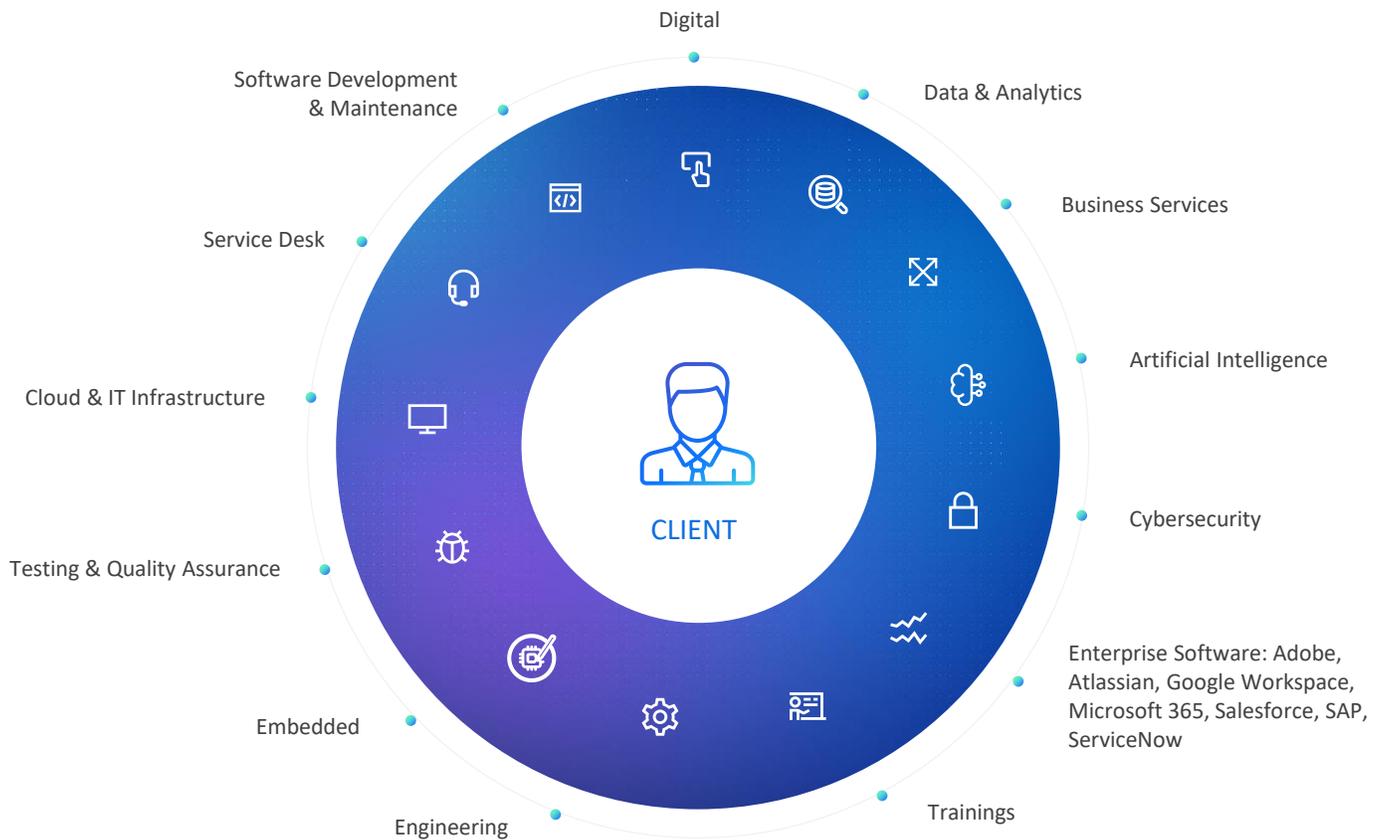

- ✓ **Microsoft 365 Copilot:** Microsoft 365 Copilot is your go-to solution for assisting employees with various work-related tasks. Whether it's creating Excel formulas, preparing slides for a meeting, or assisting in writing, Microsoft 365 Copilot integrates seamlessly with Excel, PowerPoint, Word, OneNote, and other Microsoft products. This should be your first choice before considering the creation of custom agents in Copilot Studio.
- ✓ **Custom Agents within Microsoft 365 Copilot:** If you already have a license for Microsoft 365 Copilot and need additional functionalities, custom agents can extend the capabilities of Microsoft 365 Copilot. This option is ideal for users who require more tailored solutions to meet their specific needs.
- ✓ **Copilot Studio for Custom Chatbot Experiences:** When the Microsoft 365 Copilot license does not meet your requirements - whether due to cost or lack of necessary functionalities - Copilot Studio allows you to create a custom chatbot experience. This tool provides the flexibility to design chatbots that cater to your unique business needs.
- ✓ **SharePoint Agent and Custom SharePoint Agents:** For organizations that rely on SharePoint as their primary data source, SharePoint agents are invaluable for finding information within SharePoint. Whenever possible, leverage the existing SharePoint agent. However, if your needs are highly specific, creating a custom SharePoint agent can be considered.

Why choose Microsoft AI Products with Sii?
