DATA PROTECTION CONSULTING

Assessment and implementation of Microsoft Purview Data Lost Prevention (DLP) and Microsoft Purview Information Protection (AIP/MIP)
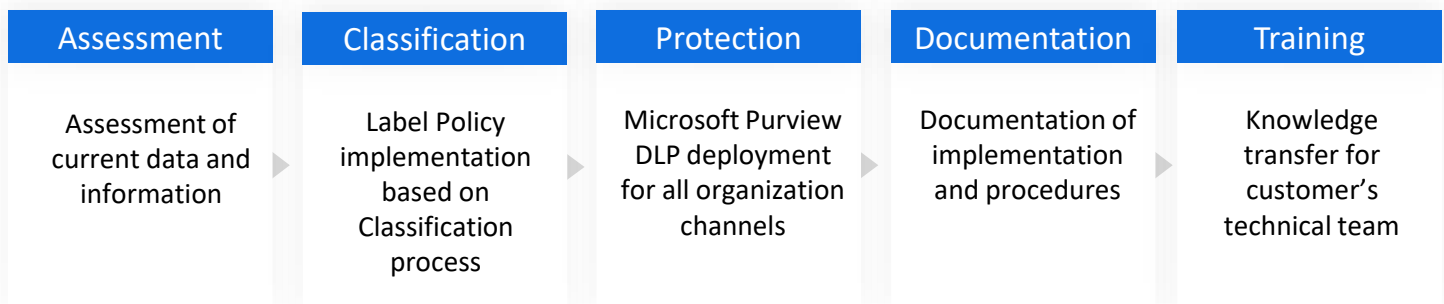

Protect business sensitive data by classifying them and against data leakage

Data management through classifications helps organization meet regulatory requirements and protect important internal data from leakage while minimizing the risk of consequences resulting from this fact. We propose:
- Data Assessment – Awareness and knowledge about what type of data an organization is foundation for successful data security. Numerous internal estimation, processes types of data covered by the protection can cause many problems for the organization. Very often these requirements result from external regulations. In cooperation with the client, an experienced SII team will help classify business data through an automated sensitive data search process.

- Data Classification – For data classification, we suggest Microsoft Purview Information Protection based on Labels and Content Scanning for all available channels (Files, Emails). Using the experience, the SII team will classify the data, applying appropriate Labels to them in accordance with the client's requirements, which will be used in the "Data Protection" phase to effectively protect them against unauthorized access and leakage.

- Data Protection – Using the information obtained from the previous stages we propose the use of Microsoft Purview DLP Purview tools for all available channels in the organization. Using native integration with Office365 channels, we are able to effectively secure data, monitor and react proactively with information leakage policies.

Why our clients decide to protect sensitive data against leakage

- ➢ Classification of organizational data
- ➢ Reduce the risk of data leakage
- ➢ Compliance with regulatory requirements
- ➢ Automation of the process of sharing confidential data outside

Assessment	Classification	Protection	Documentation	Training
Assessment of current data and information	Label Policy implementation based on Classification process	Microsoft Purview DLP deployment for all organization channels	Documentation of implementation and procedures	Knowledge transfer for customer's technical team

Offer – One-stop shop

The diagram shows CLIENT at the center, surrounded by services:
- Digital
- Data & Analytics
- Business Services
- Artificial Intelligence
- Cybersecurity
- Enterprise Software: Adobe, Atlassian, Google Workspace, Microsoft 365, Salesforce, SAP, ServiceNow
- Trainings
- Engineering
- Embedded
- Testing & Quality Assurance
- Cloud & IT Infrastructure
- Service Desk
- Software Development & Maintenance

Tangible Benefits / Desired Outcomes

✓ You take care of your business development - we take care of the cloud

✓ Our architects will support you in the latest technologies

✓ We are ready to maintain your infrastructure with dedicated support team

Why Sii

600 certifed experts

Solution Architects, Network Engineers, Security Engineers, DevOps Architects, Data Engineers, Azure Administrators, Azure Developer, Cybersecurity Artchitects, D365 Consultants, Power BI Analysts

Leading cloud services

Microsoft Azure, Microsoft 365, Dynamics 365, Power Platform

Innovative industry solutions

For manufacturing banking, healthcare, real estate and public sectors

End-to-end Project Support

Mrom preliminary data analysis, target model creation, implementation on dedicated devices to maintenance
