

1-day workshop - .Net cross-platform and mobile applications with Azure

One day of consulting and & application design services together with Sii experts

How it works:

Let us know briefly in few sentences about your current situation and needs, so we can delegate proper experts like Solution Architects/ Business analysis to have a workshop with you. From your end it would be great to have business persons and technical persons present on the workshop. After gathering all of the participants we will organize a 1- day workshop with you to propose the best possible solution for your needs.

Possible workshop agenda:

- Get know of your current needs and define key KPI for the project
- Assessment of your current situation (systems architecture/ infrastructure etc.)
- Identifying key areas of the project and identifying technologies(e.g. .NET, .NET MAUI, MS BLAZOR) that will solve those areas
- Identifying which Microsoft Platforms: Azure Cloud/ App Center will be most appropriate for solving key areas of the project (e.g. Notification Hubs, Azure Functions, Azure App Service, Azure Api Management, Azure CosmosDb)
- Identifying key security concerns and key projects risks
- Q&A Session

After the workshop:

We will send you in few business days a workshop summary document containing:

- as is analysis summary
- top level solution vision
- proposed next steps

Note: The given price is for online workshop, it's possible to have on site workshop, but the price will be then proposed individually per customer.

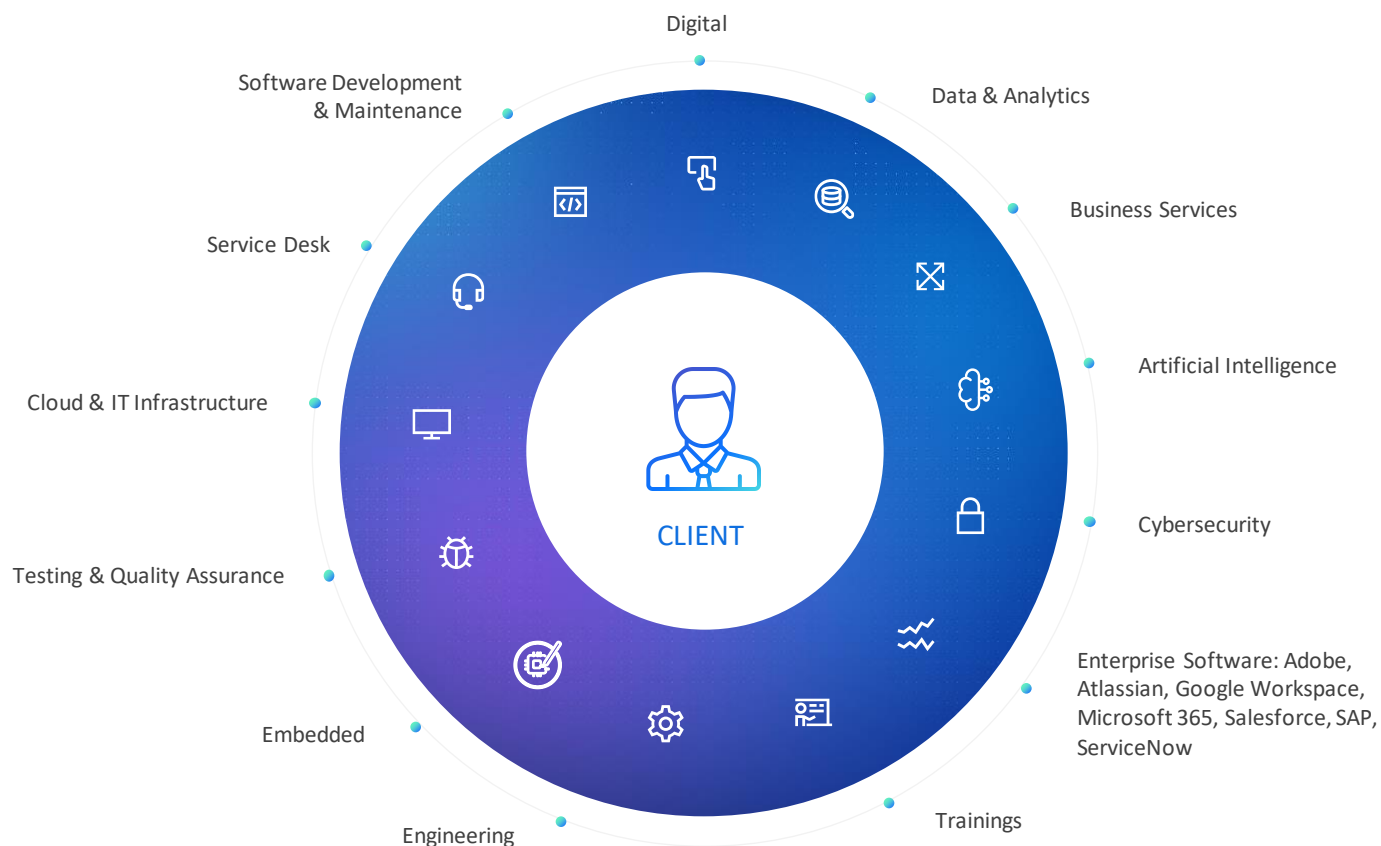

Why our clients decide

On our help:

- Asses and consult – how we can build or modernize with you a cross-platform/ mobile application with will suits your business needs in best possible way
- Trusted Vendor with a wide portfolio of delivered projects
- Trusted Vendor with a wide portfolio of delivered projects
- Project Development based on Agile approach

Offer – One-stop shop

Tangible Benefits / Desired Outcomes

- ✓ You take care of your business development - we take care of the cloud
- ✓ Our architects will support you in the latest technologies
- ✓ We are ready to maintain your infrastructure with dedicated support team

Why Sii

600 certified experts

Solution Architects, Network Engineers, Security Engineers, DevOps Architects, Data Engineers, Azure Administrators, Azure Developer, Cybersecurity Architects, D365 Consultants, Power BI Analysts

Leading cloud services

Microsoft Azure, Microsoft 365, Dynamics 365, Power Platform

Innovative industry solutions

For manufacturing banking, healthcare, real estate and public sectors

End-to-end Project Support

Mrom preliminary data analysis, target model creation, implementation on dedicated devices to maintenance
