

# SII POWER PLATFORM

4 week implementation service

Sii Power Platform 4 week implementation services refer to the process of developing and deploying customized solutions using Microsoft low code platform

Implementing Microsoft Power Platform can help your organisation to streamline the operations, improve productivity, and drive innovation.

The Power Platform includes several tools, including:

- Power Apps, Power BI, Power Automate, and Power Virtual Agents.

Our 4 week implementation service gives you the comprehensive solution to build, analyze, and automate business processes, data analytics, and artificial intelligence to unlock maximum value based on Microsoft Power Platform.

As an experienced Partner of Microsoft tools, we know how to maximize the potential of the Power Platform. Service includes training, implementation and provisioning to ensure best practices, security and governance.

Sii Power Platform 4 week implementation is tailored to the unique requirements of your needs, with scope, price, and timeline customized for each engagement. Our deliverables include high-level design architecture of Power Platform infrastructure, application readiness review, as well as license review and recommendations.

Our services cover a wide range of activities, including understanding your current manual business processes and discussing the desired outcomes. We follow up by implementing suitable Power Apps for electronic form data entry, Power Automate integration, approval workflow, and adding Power BI on top, to provide you with interactive visualizations and business intelligence.

## Benefits:

- Increased Efficiency
- Streamlined Processes
- Better Data Management
