CLOUD & INFRASTRUCTURE

MICROSOFT AZURE DATACENTER MIGRATION PLANNING 2-WEEK ASSESSMENT
SIKICH CLOUD TRANSFORMATION SERVICES TO EXPAND YOUR IT CAPABILITIES

SUMMARY

After listening to your business requirements and future business goals, we will develop an Azure datacenter migration plan to expand your IT capabilities with hosting on Azure.

DESCRIPTION

In this 2-week assessment, Sikich will engage with the customers to identify the client's requirements. An Azure datacenter migration plan will be developed to migrate the customer from the current solution to Azure hosting. Considerations will include:

- Functional Requirements
- Performance
- High Availability
- Scalability
- Disaster Recovery

An Azure architecture design will be created based on the customers' requirements. The design will include:

DESIGN DESCRIPTION	SUBSCRIPTION DETAILS	HOSTING SERVICE DESCRIPTION
Estimated Azure Usage	Network configuration	Licensing Considerations
Estimated Installation Services	Storage, Backup and Security Configuration	

Additionally, a Migration plan will be created. This will include:

- Migration Strategy
- Migration Method
- Workload Migration Schedule

SCOPE OF WORK

Meeting to determine requirements
    Define Requirements
    Define Design Criteria

Create Migration Plan
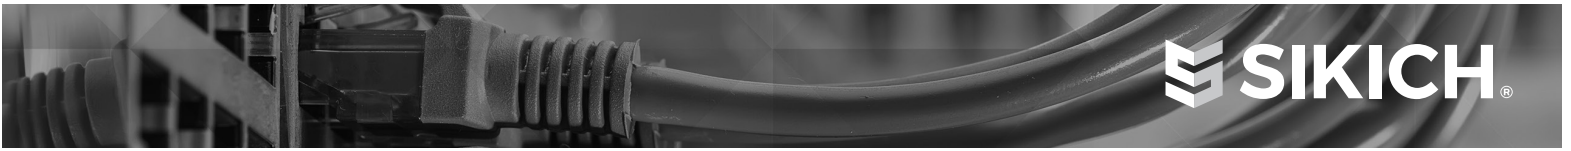

Estimate Azure Consumption

Define Migration Procedures

DELIVERABLES

Design Description

Azure Structural Architecture (Visio Diagram)

Azure Monthly Consumption Estimate

Migration Service Estimate

YOUR SINGLE PARTNER FOR CLOUD TRANSFORMATION

Sikich, the 2017 US SMB Azure Central Region Partner of the Year, is your single partner for cloud transformation. We are here to help you strategically move your business forward with Cloud Solutions.

- Single vendor across clouds – private, public and hosted - plus hybrid
- Single point of support for infrastructure, OS, services, and applications
- Tenured experience and enterprise credibility
- Single vendor for Infrastructure-as-a-Service (IaaS) and Platform-as-a-Service (PaaS)
- Run SharePoint, SQL Server, Windows Server and even ERP solutions on Azure

Fixed Fee – $4,000

Fixed Scope – Up to 15 servers

Fixed Timeline – Delivered within 2 weeks of start of engagement

WEEK ONE AGENDA
