SaaS Platform benefits

Our Simcorp SaaS Platform is a **simplified operating model** with end-to-end ownership, which will be continuously evolved, allowing clients to focus on core business

- ✓ Integrated **agility & scalability** for growth, geo expansion or on-demand capacity for immediate requirements
- ✓ Single-tenant solution with **flexibility** and full support of custom configuration and as-is support of integrations
- ✓ **Secure, robust and reliable** design with three layers of redundancy (prod + high availability, disaster recovery, and back up)
- ✓ Focus on **transforming business operations** with predictable “fixed price, fixed scope” model and metrics-based growth
- ✓ **Access to innovation** with a future proof and ever green solution with continuous improvement and clear roadmap
- ✓ One expert vendor with strong **service levels across the entire stack**, with 99.98% actual availability, and coverage for incidents and disaster recovery
