

Microsoft Fabric DevOps & CI/CD Implementation

4-6 Weeks

Offer Description

This offering enables teams to bring discipline, automation, and control to analytics delivery by implementing a robust Git-based DevOps and CI/CD framework. Reduces manual deployment risks, improve traceability.

- Deliverables:
- ✓ Git branching strategy for Fabric, Power BI, and AI asset development
 - ✓ Dev/Test/Prod workspace promotion model (including AI workloads)
 - ✓ Configured CI/CD pipelines for data, BI, and AI asset deployment
 - ✓ Automated quality gate checklist (including AI validation considerations)
 - ✓ Manual approval and release governance checklist
 - ✓ Release, rollback, and hotfix process guide
 - ✓ AI asset versioning and promotion guidelines
 - ✓ Main-to-Dev synchronization approach
 - ✓ Admin and developer knowledge transfer session
