Teams Integration and task management to manage bandwidth and break silos across divisions and subsidiaries

Engage Your Supply Chain

Copilots autonomously carry out email conversations with your suppliers to log relevant emissions data

Track supplier engagement and identify hotspots

Predict your future emissions profile based on supplier engagement

Fast Customisation and Support

We offer consultative customisations of the platform

In the rare occasions our AI Copilots can't complete the job, we step in

We offer comprehensive training resources and live sessions

# Enterprise Security, Reliability and Privacy

You stay in control of your data

| AI models never trained on customer data | Token-based authentication for all data transactions | Data is encrypted during all transactions | Outlier detection to identify mistakes |

Audit-ready accounts so you can use your data for compliance with common regulations and standards
