

Increase productivity with secure, centrally managed devices

ABOUT SIX DEGREES:

We offer managed cloud services the way they should be. With our secure by-design, flexible platform you get the peace of mind and freedom to focus on achieving your boldest aspirations—whatever those may be.

Focus your IT team on what matters

We'll create an out-of-the-box experience that applies policies and applications automatically on first login to a new device. This eliminates the need for IT to manually build and test new devices before they ship.

WHAT WE OFFER

Our Modern Device Management Service offers centralised control of Microsoft Windows 10 and Windows 11 desktops throughout their lifecycle, including provisioning, application and user management, OS patching, security policies, and remote wipe.

As standard, we'll install the most commonly required third-party applications, including Microsoft 365 apps, browsers, and a PDF reader onto your Windows 10 and Windows 11 devices.

This service includes mobile application and device-management policies, enabling you to control how, where, and when your data is accessed by Microsoft 365 and enlightened third-party mobile applications on mobile devices.

All of this is secured by multifactor authentication and optional conditional access policies.

Why Microsoft 365?

Save your company money

Microsoft 365 is available as a simply, monthly subscription. Avoid large up-front costs for new software while moving the cost of IT from capital to operating expense. And without on-premises servers to run email, websites, and document storage, you can reduce energy costs and save by no longer purchasing new server hardware.

Scale your business quickly and flexibly

Microsoft 365 grows with you on the Microsoft Azure cloud. Adding a new user is as simple as buying an additional license, which allows access to business-critical technology on up to five PCs/Macs and five mobile devices. Microsoft 365 provides many plans to fit the right capability needs and price points for each user in your organization.

Technical support

Your Microsoft 365 subscription comes with 24/7 support from a global network of experts, with one-hour response for critical, service-impacting events.

Financially backed SLA

Get peace of mind knowing your services are available when you need them with a financially backed, 99.9% uptime service-level agreement.

Simplified IT management

Reduce headaches by reducing your IT infrastructure. Content lives safely in globally distributed data centers with continuous backup and disaster recovery abilities.

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.

Key use cases

Business-class email

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

Cloud storage

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

Meet online

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

Collaborate, chat privately

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.
