

When technology becomes a cause for community and supports ways to be present in the lives of our most vulnerable members of society.

SixPivot Connected Families Solution

SixPivot is a cloud first innovator.

We are change makers who help startups, software companies, corporations and governments achieve their ambition through software. We work with business leaders to identify their biggest challenges and deliver value in days rather than months. We support our customers simplifying their vision and demonstrating what's possible by building software that creates real change. We are quick thinkers that apply technology to real-life scenarios.

We provide unique services our customers and partners from ideation, technical expertise, product development to commercialisation and vendor relationships.

WHAT WE OFFER

ConnectedFamilies enhances the Microsoft Teams platform by facilitating the booking capabilities of Age Care providers and simplifying the calling process. This results in more connected families with their isolated loved ones and a more effective outreach platform for our healthcare heroes.

Built on familiar Microsoft technologies, leveraging the Azure cloud and the Teams platform, Connected Families easily integrates existing communications tools and can be customised per Age Care facility, supporting fast roll-out and operational efficiencies

Simplified and efficient scheduling takes place through a public Bookings Website made available by the aged care facility, allowing families to organise their days and pair patients and families, securely. The booking system is customised to fit the existing aged care facility processes to simplify the adoption process.

Requirements:
Microsoft Office 365 Business or E3 or E5 license
Microsoft Bookings App
Teams calling
Facilities login with an account linked to their Microsoft Office 365 linked on the bookings platform.
Calls are made either by pre-installing the Microsoft Teams App or by relying on the browser to load the Microsoft Teams Call

WHAT OUR CUSTOMERS ARE SAYING

The partnership with SixPivot on ConnectedFamilies was a tremendous help to Anglicare at a time of great need. Using familiar technologies Anglicare has been able to respond to Covid-19 within vulnerable communities to support social connection through video interaction. Anglicare needed a solution founded on principals of simplicity that would help us continue to care of our residents in times of deep emotional crisis through connection with their loved ones.

In just under three weeks, ConnectedFamilies helped us implement a complete digital social interaction platform that was easy to use by our care workers as they setup and provided supported digital visits with customers and their families.

The solution is person centered in its design and ease of use and has the potential to reduce social isolation for people living in our villages, residential care homes and in the wider community through use of automation and scheduling features.

Andrew Longhurst
