APPLICATION MODERNISATION POC

We meet you where you are on your cloud journey

WHAT CUSTOMERS ARE SAYING

*"As we wrap up our V1 software I'd like to provide some feedback and look at what's next.
I'm over the moon with how the project has gone, it exceeded our expectations. You have a team of not just technical wizards but great people too."*

Mark McVeigh, CEO, MotoDNA

Cloud adoption is common, doing it well requires experience. SixPivot has years of expertise building and scaling cloud applications globally and cost-effectively. We help organisations create new cloud-native products and migrate existing applications from on-premise or hybrid platforms to the cloud. Not every organisation is a software company, but many have transformative technology ideas. SixPivot provides world-class software development teams to organisations across industries, turning concepts into successful products and solutions.

WHAT WE OFFER: APPLICATION MODERNISATION PROOF OF CONCEPT

SixPivot brings deep software engineering and DevOps expertise to build solutions that work immediately and scale for the future. Our Application Modernisation offering reviews your target application, identifies existing challenges, and uncovers modernisation opportunities using Azure cloud services.

Application Modernisation Engagement:

- Review and select existing application for migration
- Define target state for app service migration
- Analyse application dependencies
- Identify software changes for more effective Azure service utilisation
- Design solution architecture for migration
- Conduct proof of concept to validate approach (if required)
- Migrate source code to Azure DevOps or GitHub
- Configure CI/CD build and deployment pipelines
- Deploy application and database to Azure using pipelines
- Transfer knowledge to your team for ongoing support
- Deliver Application Migration Strategy roadmap for future migrations

WHY MICROSOFT AZURE?

Be future ready
Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly
On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud. Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your own terms
You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers. We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud
Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups. With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

MICROSOFT AZURE

"Microsoft Azure is an ever-expanding set of cloud computing services to help your organisation meet its business challenges.

With Azure, your business or organisation has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
