SixPivot Azure DevOps Assessment

SixPivot Azure DevOps Consulting Services: Elevate Your Azure Experience

Unlock the full potential of Microsoft Azure with SixPivot's expert consulting services tailored to guide you through every step of your journey. Whether you're just starting out or looking to expand your utilisation of Azure, our team of seasoned professionals is here to provide the expertise, capabilities, and know-how you need.

At SixPivot, we understand that successful adoption and optimisation of Azure require more than just access to tools—it demands a strategic approach and deep technical knowledge. Our Azure DevOps Consulting Services are designed to empower your organisation by enhancing collaboration, accelerating development cycles, and maximising the value of Azure.

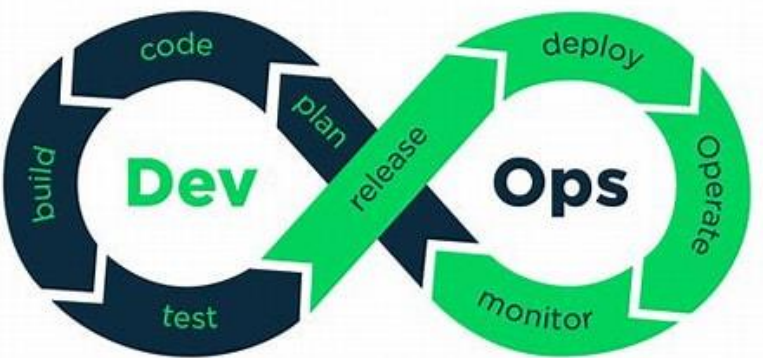

Through our transformative approach, SixPivot facilitates a cultural shift within your organization by instilling DevOps principles and practices that drive efficiency and innovation. Central to our methodology is the strategic utilization of Microsoft Azure services, ensuring that your journey with Azure is not only seamless but also maximally effective.

From the initial planning stages to deployment and beyond, our tailored processes and methodologies are designed to leverage the full potential of Azure DevOps. We don't just implement Azure DevOps; we integrate it into your workflows in a way that enhances productivity and accelerates time-to-market.

Our team of DevOps experts specializes in automating processes and fostering a culture of collaboration across your organization, all within the Azure ecosystem. By harnessing the capabilities of Azure DevOps Services, we empower your teams to build, test, and deploy software faster and with enhanced reliability.

Whether your goal is to improve application delivery, enhance software quality, or optimize resource utilization, SixPivot is your trusted partner every step of the way. We provide the expertise, capabilities, and know-how necessary to get started with or extend your use of Microsoft Azure effectively.

Experience the transformative power of DevOps with SixPivot Azure DevOps Consulting Services. Let us help you elevate your Azure experience and unlock new possibilities for your business. With our guidance, you can leverage Azure to its fullest potential and drive meaningful change within your organization.

"Since we've started working with SixPivot DevOps experts, we've been able to streamline our build and deployment pipelines, saving us time and resources. Their expertise in cloud automation has allowed us to significantly reduce costs by automatically taking down non-production environments when they're not in use. They've also helped us leverage shared services provided by our enterprise, ensuring we're compliant with all security and naming standards."

— Vessi O'Mahoney, Delivery Manager - Engineering, COLES

To get started we offer two assessment packages:

Assess-IT	5 days
Deliverable	Assess, Design & Plan
Assessment Report	Assessment and Roadmap – Provides insight into the maturity of your software development capabilities and recommends potential improvements.
Architecture Design	Current vs Desired state & Progression Framework
Deployment Plan	DevOps Implementation Recommendations – Provides you with an implementation plan with actionable steps to improve your organization's capacity for continuous delivery.
	Phase 1: Pre-Engagement Activities – Day 0 Phase 2: Kick-off and Presentation – Day 1 Phase 3: Workshops and Interviews – Day 2 – 3 Phase 4: DevOps Implementation Assessment Deliverable Development – Day 4 Phase 5: Plan and Resources Delivery – Day 5
Total Cost Inc:	$13,200

POC-IT	10 days
Deliverable	Assess, Design, Plan & PoC
Assessment Report	Assessment and Roadmap – Provides insight into the maturity of your software development capabilities and recommends potential improvements.
Architecture Design	Current vs Desired state & Progression Framework
Deployment Plan	DevOps Implementation Recommendations – Provides you with an implementation plan with actionable steps to improve your organization's capacity for continuous delivery.
PoC (Proof of Concept)	The POC is a tightly controlled, limited scope session using a temporary tenant or deployment intended to show you the particular capabilities and features in action.
	The 10-day POC-IT will include the first 5 days of the Assess-IT, plus an additional 5 days to develop the Proof of Concept (POC). POC – Example scenarios include: a DevTest solution in support of standardized test environments; an automated Release Management solution; or, for mobile development, the implementation of Xamarin Test Cloud and the automated testing in support of higher quality software. The end result of this engagement is a mature DevOps workflow. This POC implementation IS NOT A FULL INSTALLATION and will not meet all your production requirements. As a part of this engagement, we will provide next steps for moving to a full production environment.
Total Cost Inc:	$24,200
