Skydda Security Platform

skydda.ai · Azure Marketplace Listing

ABOUT

Skydda is an AI-powered security operations platform that automates threat detection, investigation, and response. Designed for security teams that need to do more with less, Skydda reduces alert fatigue, accelerates mean time to respond, and integrates with leading security platforms including Microsoft, Google SecOps, CrowdStrike, Palo Alto Networks, and more.

Skydda works continuously in the background — monitoring, correlating, and investigating alerts 24/7 — so your analysts can focus on the threats that matter most.

KEY CAPABILITIES

- Autonomous alert triage and AI-led investigation
- Multi-source signal correlation across SIEM, EDR, and email
- Automated containment and response playbooks
- Threat intelligence enrichment and context
- Compliance reporting and audit trail
- Native integration with Microsoft security stack, Google SecOps, CrowdStrike, Palo Alto Networks, and more
- Multi-tenant support for MSSPs and enterprise teams

PRICING

Annual subscription plans based on contracted package terms. Overage beyond the included package is available and priced separately. Contact contact@skydda.ai for a custom private offer tailored to your use case. Azure infrastructure costs may apply separately.

PLAN	INCLUDES	PRICE	OVERAGE
1-Year	Standard package	$100,000 / yr	Custom
2-Year	Standard package	$150,000 / 2 yr	Custom
