

DataMiner xOps Platform

DataMiner is a transformational xOps platform that empowers organizations to capitalize on their data and controls, unlocking unrivaled efficiency, agility, and innovation.

Organizations sit on a wealth of data yet struggle to fully capitalize on it.

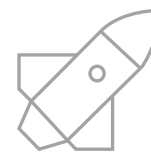

The world is more connected, data-driven, and unpredictable, with technology evolving at an ever-accelerating pace.

Yet organizations still struggle to fully capitalize on this because of fragmented technologies and inadequate solutions.

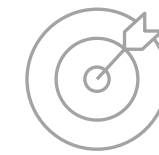

Primary challenges

Success in any organization depends on connecting critical dots across every stage of operations. Too often these remain fragmented across silos, tools, and workflows because of fragmented technologies and inadequate solutions.

Ideal solution

The solution is an agile, data-driven platform purpose-designed to empower organizations to fully capitalize on their data and controls. It achieves this by consolidating and unifying data and controls from diverse sources and assets, digitizing the entire organization.

Desired outcomes

DataMiner is a powerful xOps platform that helps you rapidly transform your organization, leading to significant cost savings, optimized resource use, proactive operations management, enhanced security, and a smaller footprint.

DataMiner - xOps platform

DataMiner is Open by Design – Powerful by Nature. Often you want the freedom of “Do it Yourself”, but you know it comes with an exorbitant cost, effort, and risk. Other times, you want the speed of out-of-the-box solutions but are held back by compromises and missed opportunities. DataMiner gives you the best of both worlds.

Maximum creative freedom

As a transformational platform, DataMiner features a pronounced open architecture. From data ingest and control, through digital twin modeling, workflows, AI, and automation, all the way up to data and control consumption.

Standard solutions

With DataMiner, you can tap into an ever-growing abundance of standard out-of-the-box solutions, accelerating your journey. Benefit from out-of-the-box convenience, without compromising your freedom to innovate.

Community power

With DataMiner, you are joining a vibrant, global community of innovators, experts, and forward-thinkers. This community provides an invaluable foundation for accelerating your innovation and maximizing your outcomes.

Skyline Communications, DataMiner, and Microsoft Azure

Better. Faster. Cheaper. With DataMiner as a Service, you can spin up your DataMiner solution in the Azure Cloud within minutes. Boost your productivity, enjoy the ease of cloud computing, rely on top-notch security, and scale effortlessly as your needs grow.

dataminer.services

dataminer.services is your gateway to digital transformation, offering collaboration, platform, and DevOps empowerment services right at your fingertips.

DataMiner Catalog

The catalog is a centralized repository for all DataMiner solutions, streamlining the management and access to connectors, automation scripts, and packages. It is hosted on the MS Azure stack.

Effortless Storage

DataMiner Storage as a Service (STaaS), leveraging Azure's cloud-native storage solutions, offers automated management, updates, patching, and database administration.
