

# Copilot Readiness Assessment

## Unlock the Full Potential of Microsoft Copilot Securely and Strategically

### SUMMARY

As AI transforms the workplace, IT leaders face a critical challenge: How to adopt Microsoft Copilot in a way that enhances productivity without compromising security, compliance, or control. SkyNorth's Copilot Readiness Program is designed specifically for organizations that are ready to explore Copilot but need expert guidance to prepare their Microsoft 365 environment. We help you cut through the complexity by focusing on what matters most: protecting your data, securing your identities, and ensuring your infrastructure is ready for AI. From data classification and access controls to compliance alignment and pilot planning, we provide a clear, actionable roadmap to get your organization Copilot ready allowing you to lead with confidence and deliver measurable value.

### FOCUS AREAS

- ✓ **Copilot Readiness Assessments** identifying gaps and opportunities for generative AI
- ✓ **Data Protection Health Check** to discover sensitive data and existing data protection controls
- ✓ **Microsoft 365 Security Review** to assess alignment with Zero Trust best practices
- ✓ **AI Use Case Discovery** enabling discussions to identify Copilot value
- ✓ **Microsoft Licensing & App Review** providing visibility for licensing compatibility and efficiencies

### OUTCOMES

- ✓ **Data Protection Strategy** to safeguard sensitive information and prevent AI overexposure
- ✓ **Copilot Technical Readiness** so you know what needs to be in place to deploy Copilot
- ✓ **Secure Foundation for Generative AI Adoption** to understand risks and controls around AI in Microsoft 365
- ✓ **Actionable Copilot Deployment Roadmap** to accelerate your Copilot deployment strategy
