Microsoft 365 Zero Trust Security & Governance Assessment

From Insight to Action - Optimize your Microsoft 365 Security and Governance

SUMMARY

The Microsoft 365 Zero Trust Security and Governance Assessment is a strategic evaluation designed to help organizations strengthen their current Microsoft 365 environment through a Zero Trust approach. This assessment identifies gaps in security and governance, aligns with industry best practices, and provides a comprehensive view of your organization's security posture, data protection controls, identity management, threat mitigation, and compliance readiness. It also examines governance structures, policy enforcement, and operational alignment to ensure your Microsoft 365 investment is secure, well-managed, and delivering maximum value. By integrating Zero Trust principles, this assessment empowers technical teams and business leaders to make informed decisions, enhance organizational resilience, and confidently advance their Microsoft 365 strategy.

FOCUS AREAS

☑ **Security Posture Evaluation -** Assess identity, data, and devices ensuring your Microsoft 365 environment is configured securely and aligns with Zero Trust best practices

☑ **Governance & Compliance Review -** Evaluate data lifecycle, access controls, and audit capabilities

☑ **Configuration Benchmarking** - Compare your environment against Microsoft and industry best practices

☑ **Strategic Recommendations** - Receive prioritized findings with actionable guidance

OUTCOMES

☑ **Executive Summary Report** to provide high-level insights and key risks

☑ **Detailed Technical Assessment** delivering a deep dive into security and governance configurations, gaps, and benchmark comparisons

☑ **Prioritized Recommendations** highlighting actionable steps to enhance security maturity and optimize Microsoft 365 usage

☑ **Presentation & Stakeholder Briefing** to summarize findings in a stakeholder-friendly format with an overview and Q&A session
