

AI Platform for Industries

Our AI solution empowers your people to safely engage accurate data through generative AI, access self-serve analytics, automate tasks, and chat with personal AI copilots to fully optimize productivity across the organization.

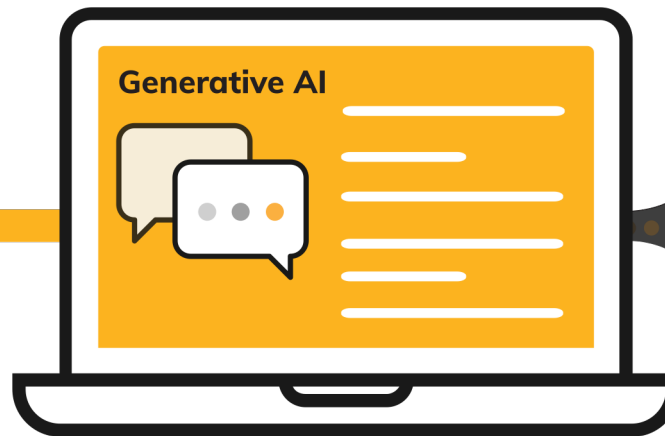

1. Unify Your Data Sources

Unify structured data (CRM, Financial, POS, etc.) unstructured data (documents, video, and audio) and external data (reviews), centered by your enterprise knowledge graph for contextual grounding.

2. Chat With Your Data (ChatGPT)

By combining your enterprise knowledge graph, and data sensitivity labels, users can quickly engage with your organization's data set, or external industry data set, using conversational language.

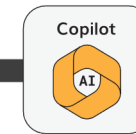

3. Optimize Productivity

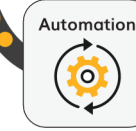

Engage **personal AI copilots** to streamline and act on key business elements:

- ✓ ChatUX - Teams, ChatGPT, CoPilot etc.
- ✓ FP&A - Excel, Power BI etc.

- ✓ Customer 360 – Customer Engagement
- ✓ Knowledge Management – Compliance, Training, Policies & Procedures

- ✓ Market Intelligence - Sales & Marketing Automation
- ✓ Custom Reports - Benchmarking and Analytics

Your Partner for the Era of AI:

We help plot the right course to stay nimble in the era of enterprise AI.

- Explore modern data platforms (Azure, Databricks, Fabric)
- Elevate data literacy across the org with our training
- Transition from Excel to advanced BI options
- Optimize your current ecosystem
