

Gain visibility into Power BI usage to enable **adoption tracking**, **content governance**, and **data discovery** with Slalom's pre-built Power BI Accelerator

Challenges

Power BI offers users incredible flexibility to create, Slalom's Power BI Monitoring Accelerator delivers flexibility to monitor usage and leverage data to manage your environment. Measure, Govern, and Enable.

Measuring Adoption

Governing & Managing Content

Enabling Data Discovery

Solution & Approach

Extract and transform detailed activity log and metadata through Power BI Admin APIs and land the data into a purpose-built data store for self-service monitoring.

Integration with Power BI Admin APIs

Custom, pre-built code ready to run in your tenant with only a few configurations

Purpose-built datastore

All necessary tables, fields & views needed to start monitoring your Power BI tenant. IaC included to accelerate deployment.

Power BI Monitoring Reports & Datasets

Pre-configured, self-service dataset with associated reports that are ready to be customized to fit your needs.

Let's get started

Use Case Workshop

Two-hour use case identification workshop with Business and Data & Analytics leaders

Monitoring Application

8-12 week engagement to create custom Power BI Monitoring Solution
