Azure Sovereign Landing Zone Accelerator (Ready)

slalom

Our Sovereign Landing Zone Accelerator helps organisations design and deploy Azure landing zones that meet the highest standards of data sovereignty, security, and compliance. We combine human expertise with AI-driven insights to deliver infrastructure-as-code foundations that are tailored to your regulatory context, workload needs, and operational maturity. Our goal: empower you to understand, operate, and evolve the sovereign cloud foundation.

THE THREE CRUCIAL QUESTIONS

Which of your workloads require **sovereign controls**, and how do you identify them?

How can you **ensure compliance** with the EU regulations while **maintaining agility**?

Are your teams enabled to **manage** and **evolve** your **sovereign landing zone**?

AZURE SOVEREIGN LANDING ZONE ACCELERATOR DELIVERABLES

This accelerator delivers a production-ready, secure, and lifecycle-aware sovereign landing zone foundation, including:

Workload Discovery & Classification
- Workshops to identify and prioritise workloads requiring sovereign controls.
- Mapping of regulatory, security, and residency requirements.

Three-Pillar Landing Zone Design/Review
- **Tenant Landing Zone:** Identity, access, and governance aligned with Zero Trust.
- **Platform Landing Zone:** Core services like networking, monitoring, and automation.
- **Application Landing Zones:** Tailored environments for workloads with deep focus on security, compliance, and lifecycle management.

Sovereignty-Ready Architecture
- Based on Microsoft's Sovereign Landing Zone (SLZ) architecture and Slalom Best Practices
- Includes Azure-native IaC and PaC
- Aligns with the Cloud Adoption Framework and Sovereignty Baseline policies

Automation & Enablement
- Infrastructure as Code (Terraform) for full automation and repeatability.
- Documentation and enablement sessions to ensure your teams understand and own the solution.

WHY WE CAN HELP

Powered by AI to accelerate discovery, analysis, and decision-making through intelligent automation and data-driven insights.

Strong partnership with Microsoft to bring early access, co-innovation, and deep alignment to your cloud journey.

Proven frameworks and best practices that don't just accelerate delivery – they're designed around your business, your processes, and your goals.

Centered on people to ensure your teams are engaged, enabled, and aligned – because transformation only works when people are part of the journey.
