

Slalom's Data Governance Purview Quick Start

Discover how Purview Data Governance tools can be leveraged to add value to your organization's data operations. Get started on your journey to data transparency with Slalom's Purview Governance Quick Start. This Quick Start can help you build a solid foundation for managing, discovering, and protecting your organization's data. Slalom will walk you through planning, infrastructure and asset considerations, provision the Purview service, and build a roadmap for further data governance maturity.

Expected Outcomes of Slalom's Data Governance Purview Quick Start

- 1. Foundational Data Catalog:** Better understand the Purview Data Governance features and configuration best practices to drive business value.
- 2. Enhanced Data Visibility and Collaboration :** Organize data into a centrally located data catalog to make it easier for users to find and access the data the need.
- 3. Improved Compliance:** Maintain records of sensitive information types, access permissions, and data ownership changes to support regulatory compliance initiatives.
- 4. Streamlined Data Management:** Automate data discovery, sensitive data classification, and data lineage to help users and data practitioners to understand the full organizational data landscape.
- 5. Integrated Data Governance Roadmap:** A custom, strategic plan for enhancing your data governance maturity and leveraging Purview capabilities for data security, governance, and management.

Get Started with Purview Unified Data Governance

Slalom's Data Governance Quick Start provides a comprehensive introduction to Microsoft Purview Data Governance. The program includes data governance planning, architecture considerations, and an MVP implementation of the Purview Data Governance portal. This Quick Start is designed to help build a solid foundation, enabling efficient discovery and classification of data and a roadmap for continued value add and catalog adoption.

Activities:

- Data Governance Vision and Strategy
- Infrastructure Considerations, Integrations, and Data Processes
- Define MVP Data Assets
- Role-Based Access Control Planning
