About Slalom

Slalom is a **purpose-led**, global business and technology consulting company.

From strategy to implementation, our approach is fiercely human. We deeply understand our customers—and their customers—to deliver practical, end-to-end solutions that drive meaningful impact.

slalom | ▦ **Microsoft**

Microsoft & Slalom achieve more together.

Our business was built on Microsoft, and for nearly two decades, we've delivered innovation together. It starts with our shared purpose: realizing greater impact through collaboration and enabling every person and organization on the planet to achieve more.

We're partnering with change-making clients to shape the future around Microsoft technology—that's because as we look to the next two decades and beyond, we know the future will be built on Microsoft, too.

Microsoft Entra

Secure access for a connected world

What is
Microsoft Entra?

Microsoft Entra is a new product family name for Microsoft's identity and access products.

It is not a replacement of rebranding of Azure Active Directory (Azure AD). Azure AD remains our hero identity solution, and now becomes a part of Microsoft Entra.

We're introducing a new name because we're expanding in several new categories and need name that can convey modern access security across broad range of products.
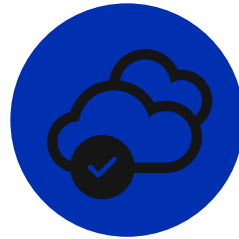

Microsoft Entra

Secure access for a connected world.

Azure Active Directory

Protect your users, apps, workloads, and devices.

Permissions Management

One unified model to manage permissions of any identity across any cloud.

Verified ID

Enable more secure interactions while respecting privacy with an industry-leading global platform.

Azure AD Integration Scenarios

Cloud Identity	Synchronized Identity	Federated Identity

Cloud Identity

Azure Active Directory

Azure Active Directory

Independent cloud identities.

Synchronized Identity

Azure Active Directory

Azure AD Connect sync	Azure AD Connect cloud sync

Active Directory

Single identity, enabling a same or single sign-on experience with Password Hash Sync or Pass-through Authentication*.

Federated Identity

Azure Active Directory

Azure AD Connect sync (cloud sync)	Federation

Active Directory

Single federated identity, enabling single-sign-on experience and on-premises multi-factor authentication options

Secure adaptive access

Protect access to resources and data with strong authentication and risk-based access policies

User-friendly multifactor authentication (MFA) support

Configurable Conditional Access policies based on context and risk assessment

User and entity behavior analytics (UEBA) to automatically protect against identity compromise

Seamless user experiences

Provides an easy, fast sign in experience to keep your users productive, reduce time managing passwords, and increase end user productivity

Single sign-on (SSO) for
any user type and any app

End user self-service portal to
discover and launch applications,
request access, and manage profile

Convenient, phishing resistant
passwordless credentials
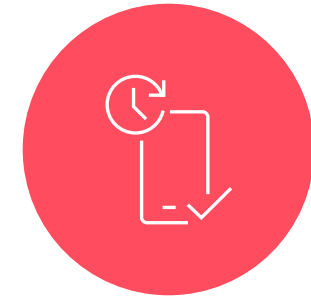

Simplified access governance

Control access to apps and data for all users and admins efficiently with automated identity governance, to ensure only authorized users have access

Automatic users and guests lifecycle management

**Grant and review access entitlements for employees and guest users**

Privileged identity management to remove excessive access

Microsoft Entra Permissions Management

Manage permissions based on historical usage and activities

SSPR Solution Architecture
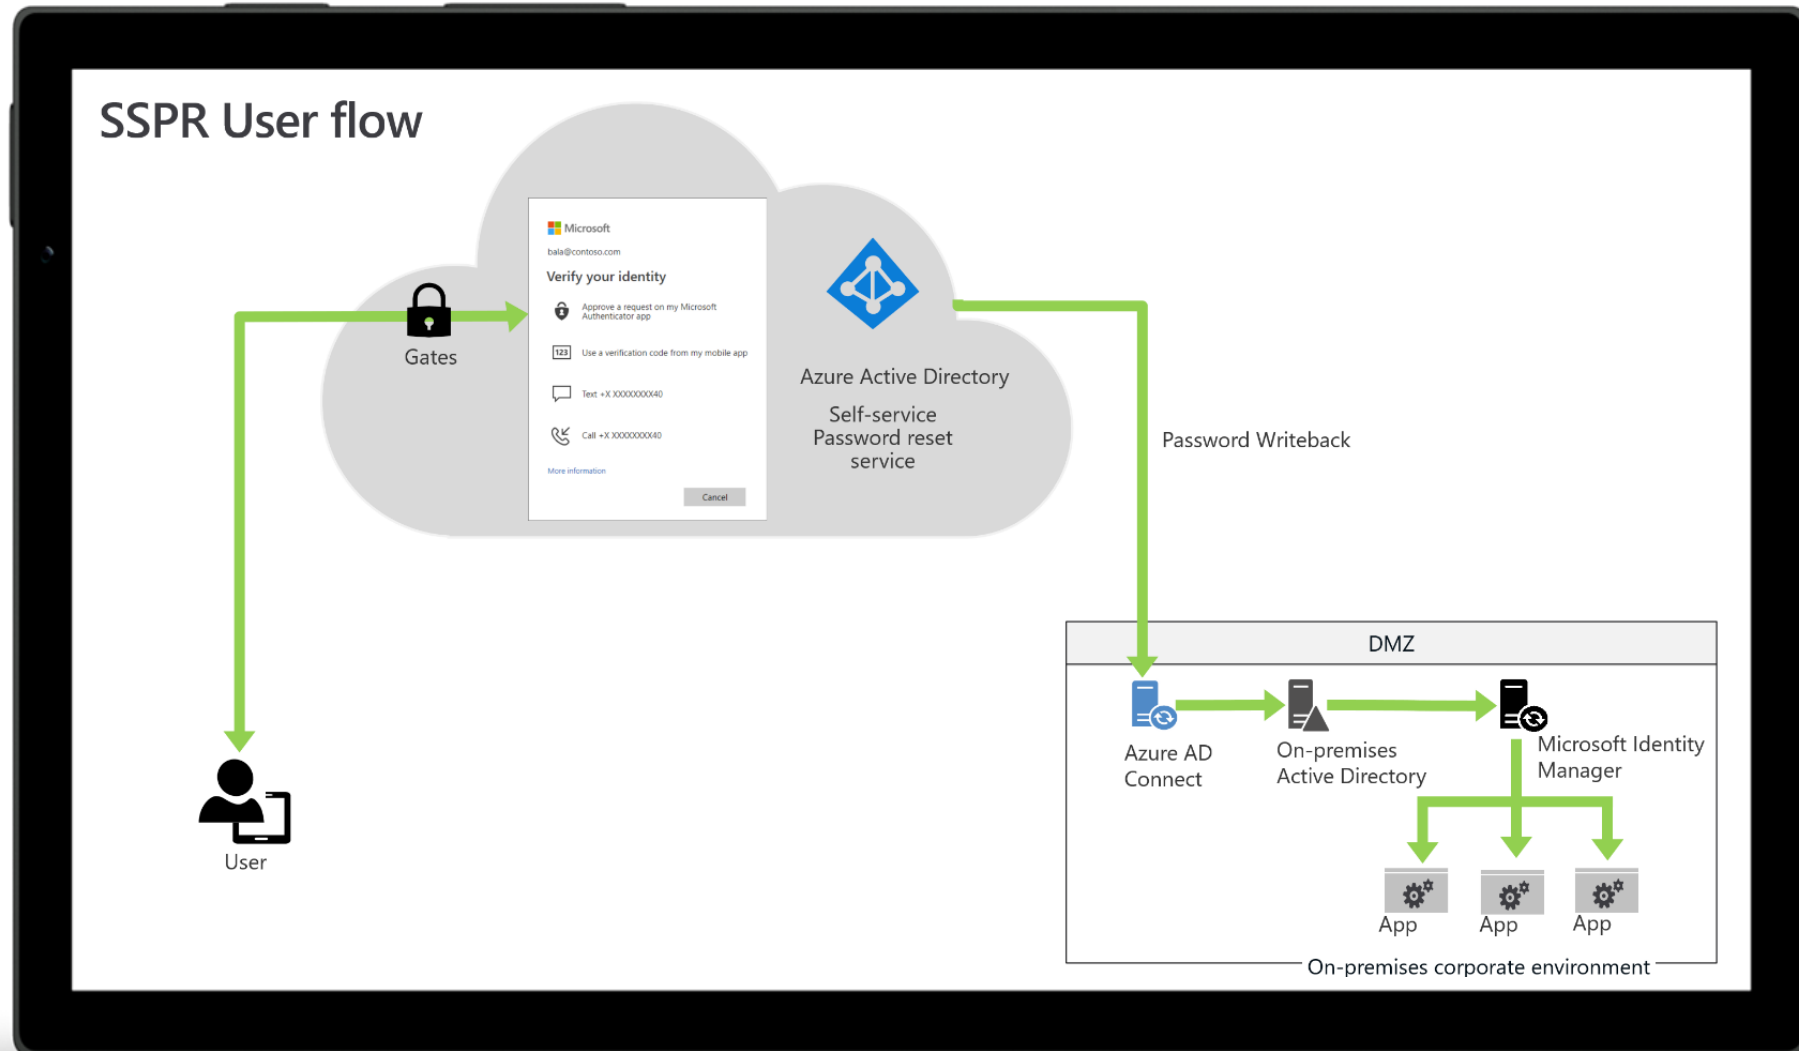

Multi-Factor Authentication

Verify user identities with strong authentication to establish trust

We support a broad range of multi-factor authentication options

Push Notification

SMS, Voice

Soft Tokens OTP

Hard Tokens OTP

## Including passwordless technology

Microsoft Authenticator

Windows Hello

FIDO2 Security key

Biometrics

Multi-factor authentication prevents 99.9% of identity attacks

Your password doesn't matter, but MFA does

81%

of breaches leverage stolen or weak passwords

MFA Credentials

Windows Hello

FIDO2 Security key

Microsoft Authenticator

OATH Hard Tokens

SMS, Voice

Free MFA options in all Azure AD subscriptions

Multi-factor authentication prevents 99.9% of identity attacks

Verified ID

Enable more secure interactions while respecting privacy with an industry-leading global platform.

Fast remote onboarding
Validate identity information for trustworthy self-service enrollment and reduced time-to-hire.

More secure access
Quickly verify an individual's credentials and status to grant least-privilege access with confidence.

Easy account recovery
Replace support calls and security questions with a streamlined self-service process to verify identities.

Custom business solutions
Easily build solutions for a wide range of use cases with our developer kit, APIs, and documentation.
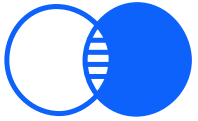

Our Approach

slalom | ■ Microsoft

Technology that empowers your business

Security in harmony with your business

People First

We aren't just here to implement technology; we are here to implement technology that works for you.
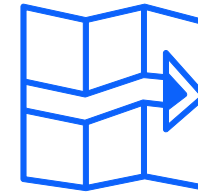

We work alongside your teams to bring business process and technology together.

Impactful Delivery

Leverage our industry and product expertise to quickly navigate everchanging compliance and regulatory requirements

Enable flexibility with solutions and policies tailored to your unique needs

Long Term Planning

Set you up for a successful future, drive meaningful impact, and limit business disruption.

What's next for you?
