Power BI Metadata Monitoring Accelerator

A scalable solution enabling adoption tracking, content governance, and data discovery

The journey

Companies everywhere are on a journey to modernize, and we help them solve for major milestones:

- A lack of trust in their data
- Fragmented data sources
- Bottlenecks in report generation
- Excel-driven cultures.

But what comes next?

How are we measuring behavior change and adoption?

How are we managing and governing content?

How are we enabling data discovery?

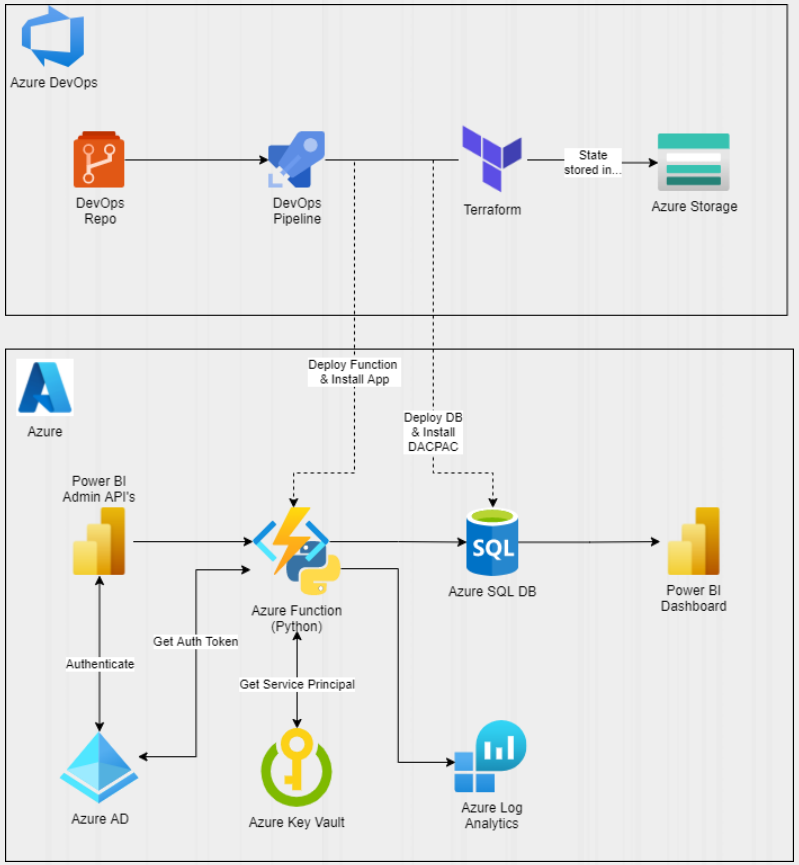
Solution



Extract and transform detailed activity log and metadata through Power BI Admin APIs and land the data into a purpose-built data store for self-service monitoring.

Integration with Power BI Admin APIs

Custom, pre-built code ready to run in your tenant with only minor configuration.

Purpose-built datastore

All necessary tables, fields, and views to start monitoring tenant.

Power BI Monitoring Reports and Datasets

Pre-configured, self-service dataset with associated reports, ready to be customized to fit various monitoring and governance requirements.

Seamless deployment

Infrastructure as Code and complete CI/CD pipeline for integration and database elements included in solution to accelerate deployment.

Example: self-service usage monitoring dashboards

- Monitors overall Power BI usage
- Enable admins to identify popular datasets and reports for future certification
- Identify high-usage Workspaces
- Make strides towards enterprise governance by identifying ad-hoc data sources
- Out of the box usage metrics enhanced to include additional user attributes and focus on datasets

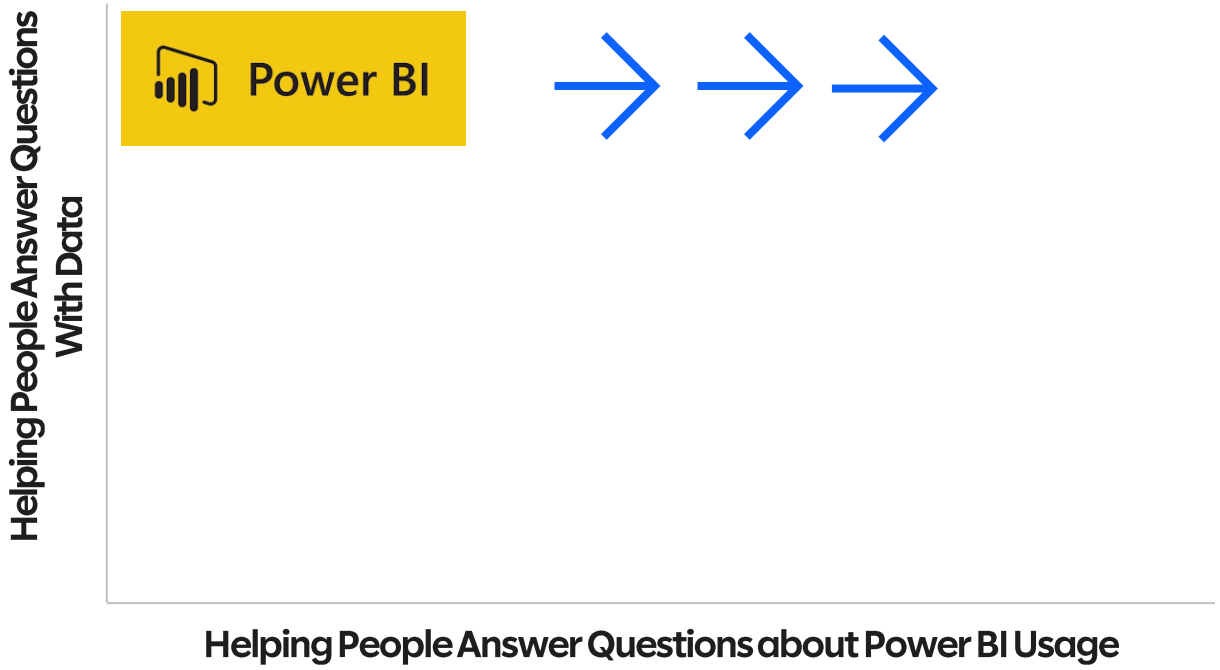
Where does this take you?



A small subset of unanswered questions...

- What users are performing self-service?
- What are top viewed reports/datasets?
- What are the main actions users are performing with a report?
- What highly used reports/datasets should we promote?
- What reports/datasets should we sunset?
- Who deleted this report?
- Who are the power users?
- Who are the SMEs for this dataset?
- What reports are other users in my function using?

Getting Started

Use Case Workshop
2 Hour use case identification workshop with Business and Data leaders

Monitoring Application Deployment
6-8 week engagement to create Power BI Monitoring capability

Enterprise Governance Journey
Additional engagement of customized length to mature BI governance principles utilizing the monitoring application

How are we measuring behavior change and adoption?

How are we managing and governing content?

How are we enabling data discovery?
