Security QuickScan
Get insight in security risks and vulnerabilities

Due to the growth of online services and online collaboration with Office 365 and Microsoft Teams the risks and vulnerabilities also shift to the cloud. Get a good insight in these risks and vulnerabilities and a tailormade advise on how to deal with it.

With the Security QuickScan we make a clear view on your (online) environment so we know exactly where your risks are. We will present our findings and deliver a report on where you can take immediate action.

With the Security QuickScan you are ready for the future.

Why customers use the Security QuickScan:

- Know their risks and vulnerabilities
- Clear report with insights and advise
- Access to certified Licensing & Technical Professionals

Full insight report

- Know exactly where you are at risk
- See where you have vulnerabilities
- Tailormade advise on improvements

Don't think you are always safe

Future ready security plan

- Security Solution delivered and ready to use
- Solve your risks
- Clear view on options and costs

Be advised on where to take actions

Access to knowledge

- We know Education best practices
- Use our certified technical professionals
- Connect with peers

Schools: connect with others is extremely valuable

Some of the results of the scan were a surprise for our board-members, but we see this has a positive effect. It creates a broad consensus on a strong security-roadmap. – Wietse de Graaf, Security Officer, Horizon College
