

## How to Achieve the Modern Workplace

Companies are ready to transform and support a workforce that is more mobile and diverse than ever before, and they depend on the latest advancements in technology to do so. Innovative technologies can help all types of organizations to respond to emerging workplace trends and create a perfect work environment for employees to thrive.

### Workforce collaboration

With the fast pace and complexity of business today, almost all workers are members of cross-functional, virtual, or internal teams. Teamwork in the workplace can improve engagement, creativity, efficiency, and innovation, yet it remains among the most underutilized tools.

Research indicates that 39% of employees believe that colleagues in their organization don't collaborate enough. Another 75% of workers see teamwork and collaboration as "very important," but only 18% of them get the communication valuation on their performance.

So, the drive is there, and there is no doubt that employees want more collaboration to achieve the company's objectives. What they need is the right leadership to foresee this change. Workforce collaboration doesn't happen on its own; it needs to come from the top, down.

### Unlocking Value through Social Technologies

While 72 percent of companies in the world use social technologies, very few have achieved the full potential benefit. The McKinsey Global Institute (MGI) has found that using social techniques can help raise employee productivity by 20 to 25 percent.

Companies can leverage the capabilities of social platforms to generate richer insights and create customer targeted messages and offers. The study further suggests that the full implementation of social technologies can help companies raise the productivity level of workers including managers and professionals.

To get the most out of social technologies, organizations must work on their processes, structures, and cultures to make them more open and nonhierarchical.

### Provide Employees with Modern Tools

It is a fact that providing employees with modern tools can help increase overall employee engagement levels (which is crucial for reducing the employee turnover rate) and higher productivity.

Furthermore, by educating employees on the importance of cybersecurity and using the best tools and practices to help safeguard data, they will be more engaged and satisfied in their current roles and will also feel like they are contributing to protecting the business as a whole.

The right digital tools connect and support employees, wherever they are, to encourage productivity, engagement, and collaboration. **Microsoft 365** powers modern workplace with

one bundle of products: a smart, efficient operating system, mission-critical enterprise-grade security tools, and seamlessly integrated workplace productivity apps.

## SUCCESS STORY: OFFICE 365 MIGRATION (POLAND)

## Project Description

- Migration of Exchange Mailboxes to Office 365
- Consolidate and Merge Active Directory of 170 Agencies
- Assessment and Migration of On-Premise workload to Microsoft Azure
- Tenancy Management and Hyper-care Support

## Value Delivered

- Migration with 100% success Rate
- Minimal disruption of services during AD & Azure Migration
- End User Satisfaction with seamless exchange migration to Office
- Collaborative experience using Office 365 extended Suite of Products
- Highly Scalable Cloud Solution
