Complete Migration from Google Workspace to Microsoft 365

We migrate customers' data and information from Google Workspace (Formerly G Suite) apps and services to Microsoft apps and services, and enable them to continue the amazing jobs they have been doing, leveraging Microsoft Ecosystem.

Key Deliverables

We meet and discuss with you about

Workloads need to be migrated such as Mailboxes, Personal Drives and Shared Drives, SharePoint sites to be built, Devices need to be managed, etc.

Mailbox Migrating

We migrate your Mailboxes from Google Workspace to Microsoft 365 With emails, calendar, contacts, and attachments without any data loss.

Personal Drive Migration

We migrate your Google Workspace Personal Drives to your Microsoft 365 OneDrive. Except forms, we migrate all types data from Google Drives to OneDrive. Change Management is intelligible and intuitive. We retain the same control an user has over his personal data and make it even better.

Security Best Practice

We implement security best practices to improve security score based on your Microsoft 365 and Azure subscriptions. We configure Role Based Security settings so that you can secure Microsoft 365 Cloud Services such as SharePoint, Teams, Exchange from Azure Portal and simplify onboarding and offboarding process.

Domain Migration

We configure your Microsoft Domain and Public DNS settings so that your email defaults to Microsoft 365 Mailboxes. Anti-spoofing measures have also been taken.

SharePoint Implementation

We build your SharePoint Intranet Portal and other sites required for your document management. We apply security trimming driven by Azure Security Groups.

Shared Drive Migration

We Migrate your Google Shred Drives to SharePoint sites and share with users based on Azure Security Group. We can configure access management with granular level control enabled.

Device Management

We configure security policies to protect business data on all devices, including iOS, Android®, and Windows PCs. Configuring settings to remotely wipe company data from lost or stolen devices.

Advanced Security

We configure Advanced Security features such as Anti-phishing, Anti-spam, Anti-malware, Safe Attachments and Safe Links.

Training and Adoption

We provide two full days familiarization training to IT staff, end users, and subject matter experts with required materials.

WHAT OUR CUSTOMERS SAY

“ Smart App Business Solutions has provided our nonprofit a complete migration from Google Workspace to Microsoft 365 and gave us onboarding to Microsoft 365 quickly.

Aziz Dindar

Chief Financial Officer, Penny Appeal Australia

We also carry out other type of Migrations such as

1. On-Premises to Microsoft 365 Migration
2. Microsoft 365 Tenant to Tenant Migration
