

Founded in 2017, Smarten Spaces is a global AI company dedicated to developing intuitive technology for space management and enhancing employee experiences. Our disruptive technology helps companies optimize and reduce space usage by up to 30%, saving millions of dollars while maintaining an excellent employee experience.

Smarten Spaces has a proven track record of generating positive EBITDA by successfully selling to various Fortune 500 companies in over 30 countries.

Trusted by

Current Practices, Industry Trends and Challenges

Today's complex work environments are shaped by a **multigenerational workforce**, **team-specific workstyles**, **organizational rules**, and **geographic influences**. Current systems, designed for linear space management, lead to **manual effort**, **long turn around times**, **inaccurate output**, and **wasted resources**.

Latest data shows that 43% of companies are planning to decrease their space portfolio size by 30% over the next three years. The current systems deployed over the last three decades have outlived their utility, highlighting the need for innovative solutions like SpaceOnAi.

Introducing Smarten Spaces' latest innovation

SpaceOnAi

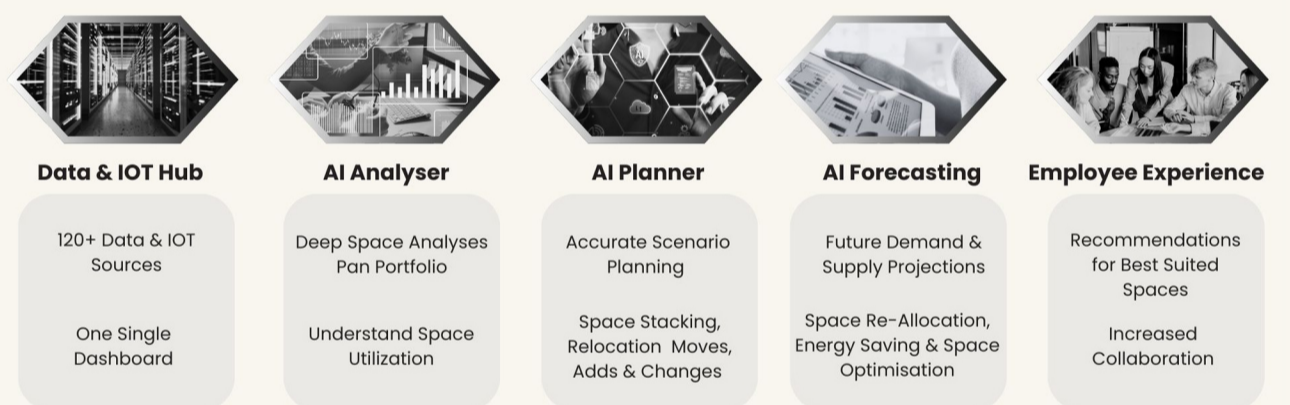

The only AI solution the workplace truly needs, and the first of its kind globally.

The AI Platform

The Product

SpaceOnAiTM

Use Cases

SpaceOnAi disrupts this multi-billion-dollar software market, allowing companies to solve these use cases with its robust AI algorithms in days rather than months, while utilizing significantly fewer resources.

- ✔ A data hub that collects data from over 125 sources including IOT (sensors, wifi, badging), business applications (finance information, employee data etc) and energy solutions (BMS). (complete)
- ✔ Relevant AI algorithms to control and manage the AI applications. (complete)
- ✔ AI applications like Scenario Planner, auto stacking, demand and supply analyzer, move manager, any space reservation, space analyzer and many other modules to optimize and manage space. (complete)
- ✔ A single LLM for the majority of the functions in the workplace. (under development with a 2-3 month timeline)

More specifics can be shared under NDA.

Why Smarten Spaces?

Our exceptional team has delivered results with minimal funding, engineering the only comprehensive next-generation product that meets all new workplace requirements. With over six years of intensive development, our flagship AI-powered platform seamlessly integrates with all workplace solutions, ensuring optimal space management and an enhanced employee experience. We have demonstrated expertise in global deployments and consistently achieving profitability.

We Are AI READY TODAY

The company currently self-manages a run rate of USD 4.3 million through its revenue and is seeking investment to scale SpaceOnAi further.
