

# Power User Suite for Unit4 FP&A

(prevero)

Optimize your Unit4 FP&A model landscape and increase performance with the Power User Suite from smartPM.solutions

## Performance enhancement and model optimization in Power BI

Do you have a complete overview of your planning model? The Power User Suite gives you detailed insights into your Unit4 FP&A model landscape. Answer key questions quickly and efficiently:

- How does your current planning model work? Overview of cubes, imports and KPI connections. Which cubes are actively used?
- Where are data imports located and where is manual input required? Which reports are available? How often are they used and by whom?
- Which cubes, macros or reports are causing performance issues? Where is the optimization potential for power users (e.g. reference errors, main memory usage)?

## All the advantages of the Power User Suite

### ● Interactive model visualization

Use Power BI for perfect data visualization. Whether you need detailed insights or a high-level overview, the smartPM tools make it easy to understand your data.

### ● Increase performance

Reduce load times and operating costs by optimizing database and storage usage. Avoid common issues like reference errors that can slow down your processes.

### ● Efficient knowledge management

Easily visualize the complete architecture of your data model. Quickly capture all connections and dependencies to make informed decisions and optimize your data management.

### ● Improved data quality

Identify and correct errors such as duplications quickly and reliably. This ensures that your data is always accurate and reliable.

### ● Fast and effective implementation

Benefit from rapid implementation by our experienced team of consultants. Our efficient processes enable you to benefit from the advantages of the Power User Suite immediately.

### ● Clear data structure and reports

Optimize your reporting and planning processes. Our tools help you to organize your data effectively and make reports clear and understandable.
