MAXIMIZE YOUR PRODUCTIVITY WITH MICROSOFT MODERN WORKPLACE CONSULTING SERVICES

Overview

Microsoft's goal is to enable every individual and every business on the planet to do more. Our company's culture is built around embracing a growth mentality, inspiring greatness, and motivating teams and leaders to give it their all every day. Each of us is urged by the growth mentality to dive in and discover what matters most to our clients to build the fundamental knowledge necessary for us to put them first in all we do. By doing this, we produce game-changing technologies that have an influence on billions of people's lives worldwide. You can assist us in completing our mission.

Objectives

• Gain an expert's perspective on what issues you should address first. • Optimize your environment based on Microsoft best practices to prevent issues before they arise. • Establish a baseline so you can track your progress throughout the year.

Key Takeaways

Successfully completed university degree e.g., Informatics, business informatics, business administration or a comparable vocational training. Enthusiasm to create and introduce new solutions with customers. Enthusiasm for a career as a consultant. High team and communication skills and professional appearance. Interest in new developments, digitalization, technologies & trends.

Scope

Employees place a high value on work that enlightens and fulfills them and expect to work safely from anywhere, on any device. They are happier, more valuable, and more likely to remain in their current position when their productivity tools improve the caliber and efficacy of their work experience. While giving employees this empowerment, businesses must also safeguard important IT resources. It represents a chance for you and a substantial operational change for your clients.

Your clients can increase employee productivity and satisfaction, foster more seamless communication and collaboration across locations and platforms, and uphold the security and integrity of systems and data with Microsoft Modern Workplace solutions.

Responsibilities

Delivering technical solutions to clients through Microsoft Consulting Services enables them to get the most out of their investment in Microsoft technology. Building on their extensive experience working on IT projects, consultants will collaborate with Microsoft's partners to help customers achieve high-quality engagements centered around Microsoft's solution areas, technologies,

services, and products in a variety of client scenarios. Defines the needs and limitations of customers and partners using business, technology, and sector strategies. Drives and supports innovation on the Microsoft platform with a focus on commercial outcomes for customers and industry solutions. Aims to maximize customer and partner value while maintaining a balance between Configure-Before-Customize principles and the usage of Microsoft core/baseline assets, people, products, and technologies. Creates project plans that consider the whole project life cycle, while identifying the current and future business value of each solution. Has the capacity to effectively communicate value propositions for Microsoft's most strategic goods and services. Demonstrates mastery of several goods, feature functions, or services, or a specific solution. Make sure your solutions fit the architecture's goals in order to create clear build and test specifications and customer operations manuals. Identifies the business and technical risks present in programs, evaluates their effect, and suggests mitigating measures and backup plans. Helps stakeholders throughout deployment to prevent/resolve technical problems.
