

AI-Powered Interview Platform

TalentAI is a recruitment platform that empowers humans by combining the efficiency of artificial intelligence with human insight. It accelerates hiring processes, brings greater objectivity to evaluations, and helps reduce recruitment costs.

Our **mission** is to help companies connect with the right candidates quickly, while keeping human judgment at the core of every hiring decision.

Our **vision** is to make AI a trusted assistant in recruitment—setting a new standard where technology supports and amplifies the human touch.

Strategic • Sustainable • Solutions

Problem Statement:

Lengthy and Expensive

Traditional recruitment processes take time, incur high costs, and are susceptible to human error.

Ensuring Fairness

Evaluating CVs objectively can be challenging, making impartiality difficult to achieve consistently.

Time-Intensive Interviews

Planning and conducting interviews consumes significant time and resources.

Solution

Talent AI transforms hiring end-to-end—from creating skills-focused job descriptions, to AI-powered pre-interviews and bias-free assessments, to role-play simulations and 24/7 candidate support—while keeping hiring teams fully informed—making recruitment fairer, faster, and smarter.

Instant Analysis

During the interview, the speed of speech, clarity and content are evaluated.

Automatic Report

A detailed performance report is presented to the HR team.

Easy Integration

It works in harmony with existing ATS and HR software.

Key features

AI-Powered Online Interview

Audio and video interview opportunity

AI-Powered Role Insights- Boosts your brand and connects with the right talent and engages passive candidates.

Applicant Tracking System (ATS)

Management of all candidates on a single platform
