

A blurred photograph of an office interior. Several people are seen in motion, walking through a space with glass partitions and modern office furniture. The lighting is warm, and the overall atmosphere is one of a busy, active workspace.

SmartViz | Digital-Twin-In-A-Box

Boost Building **Performance** and User **Experience**

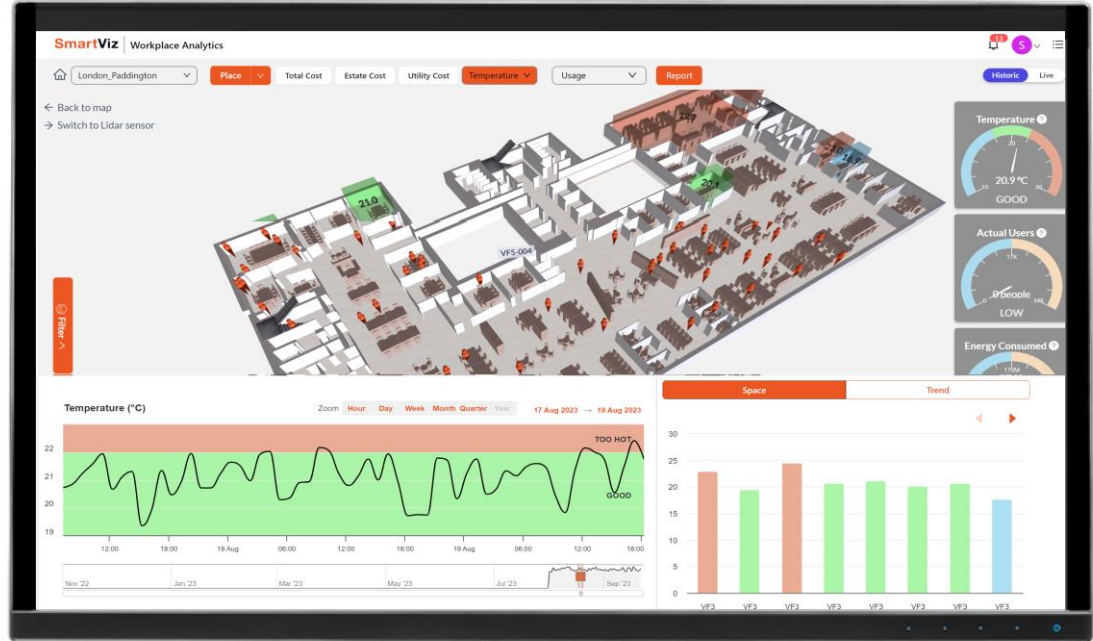

Product Brochure

Turn Your **Data** into **Outcomes**

Do you want to save space and energy costs in your buildings, while also boosting user productivity and wellbeing?

SmartViz's IoT sensors powered digital twin shows you how your buildings are used, and where space and energy can be saved.

- Boost space utilisation.
- Enhance productivity.
- Save energy costs.
- Accelerate to Net Zero.
- Create a single source of truth from diverse data to drive business decisions.

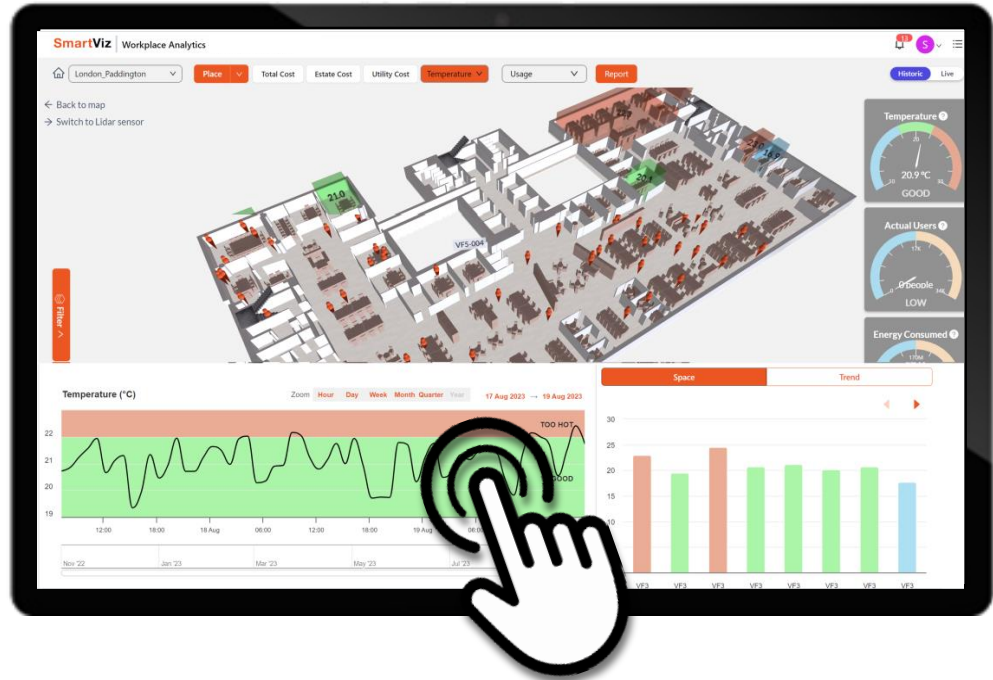

SmartViz

Digital-Twin-In-A-Box

SmartViz comes with a kit of pre-configured, smart sensors with a unique AI powered digital twin.

Just 'peel and stick' the devices and they immediately start to stream data and show you how your building and assets are used, and where space and energy is wasted, along with actionable insights to save costs and boost productivity.

SmartViz

a one-stop solution to monitor, analyse, predict, scenario plan & optimise buildings.

Deliver **Outcomes**, Not Just Data

Data is the new oil. And like the old oil, it needs processing and refinement to be turned into value.

SmartViz turns building data into cost savings, energy efficiency and productivity improvement.

SmartViz boosts space utilisation. Releases unused space. Enhances productivity. Saves energy costs. And helps accelerate to Net Zero. Typically with a 10x ROI!

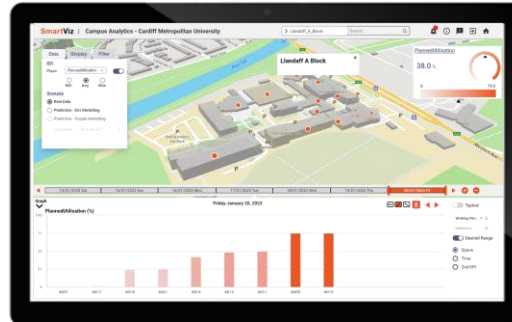

Vodafone

\$40m/yr saved across 3,500 properties

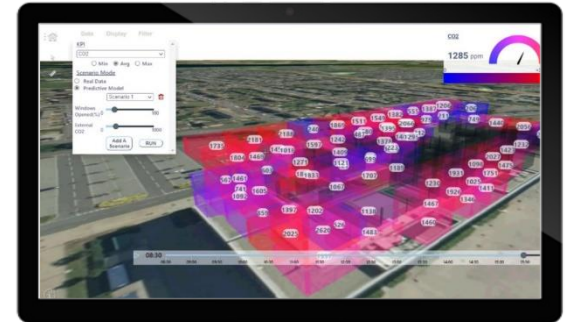

8x UK Universities

Cardiff Met: **£6.2 millions** saved

30x Scottish Schools

Saving **space** and improving **wellbeing**

Key Features and Benefits

Insights to increase **space utilisation**

Reduce **energy** consumption

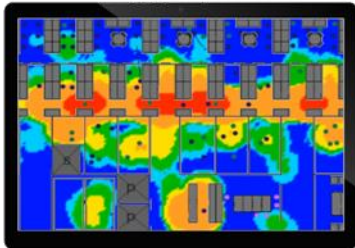

Save **cost** across portfolios

Visualise each campus, building, floor and room

PLUS live alerts and updates

Simulate 'day in life' to enhance **productivity**

Save space and create effective **hybrid workplace** solutions

Test '**what if**' scenarios

Single source of **truth** from all datasets

Testimonial – Vodafone

SmartViz is helping Vodafone save **multi-million dollars** per annum. Additionally it has reduced over **30% of meeting spaces** and highlighted opportunities for significant improvement of productivity.

The analytics and insights provided by the SmartViz platform has helped us not only streamline the data across our global portfolio of assets, it has also helped us expand our use of IoT sensors and data in boosting space **utilisation** and employee **productivity**.

Richard Muraszko
Group Property Strategy Manager, Vodafone

vodafone

Insights:

30% meeting spaces can be saved. Better utilization by sizing rooms to suit demands.

Decisions:

1/3 people time exceeds desired CO2 limit. Higher productivity achievable through better environmental control.

Outcomes:

\$40m
Savings
