

SMX Archiving

Make email management secure, efficient and scalable

Get unrivalled reliability and user-friendliness with powerful features to make your email, secure, efficient and scalable, while meeting any compliance obligations. Extending the functionality of SMX 365, SMX Archiving solution is an easy to implement email archiving and a compliance platform.

Minimise risk. Meet requirements. Avoid contestability.

Running in the background, SMX Archiving seamlessly and automatically archives all emails sent and received by the organisation.

Works seamlessly with Microsoft 365 and provides protection levels needed by large organisations, ISPs and government departments.

- Access and recover data swiftly
- Meet compliance requirements
- No hidden costs. Easy per user, per month subscription

Archiving on Microsoft Azure is SMX's highly available, scalable and cost-effective solution.

- Recover any email regardless of age, source or destination.
- Have confidence that your data cannot be deleted, changed or lost with immutable archive.
- Get unlimited archiving storage for users. Supports archiving of non-active users.
- Simplify legacy archive migration into the cloud.

A secure, scalable, reliable archiving solution, giving you seamless migration, minimal downtime, and complete assurance over the protection of your data.

SMX Archiving - How it works:

Keeps a copy of every message processed through the SMX system.

Creates a unified archive via multiple filters, RBLs, global security policies and customer policies.

User-friendly dashboard to push, validate, ingest and report on legacy archive migration.

Unified searching across active mailboxes, archive and legacy archive.

Full regulatory and standards compliance.

Additional language options, as well as English

Priced on a per user/per month subscription. For import and storage costs take a look at our SMX Migration Tools.
