

# Microsoft Security + SMX 365 Better Together

Microsoft Partner

As the world becomes more connected, email-based threats are growing exponentially. Enterprise and government need trusted and secure solutions that understand the regional threat landscape and harness the existing power of Microsoft security.

Designed specifically to compliment Microsoft 365, SMX 365 reimagines the gateway, applying a 'better together', defence-in-depth approach, reducing the risks of single-layer, sole-vendor reliance and making it an integral part of your security ecosystem.

1

## TRUE DUAL-LAYER SECURITY

- By working *with* Microsoft 365 EOP/ATP, SMX 365 decreases reliance on sole-vendor security, providing true dual-layer protection for ultimate peace of mind.
- Maintains full Microsoft 365 compatibility without disabling or compromising productivity or security capabilities, unlike the majority of other email gateways.

2

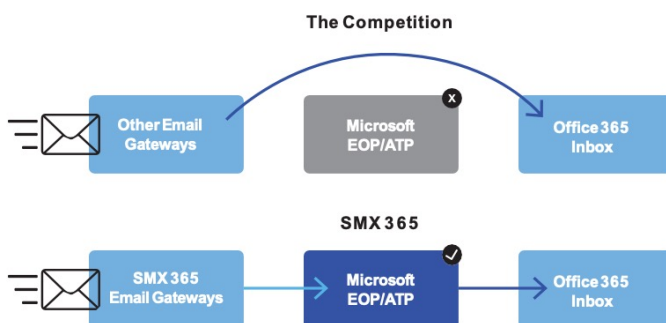

## GLOBAL & REGIONAL THREAT PROTECTION

- Tailored for our unique NZ/AU threat landscape.
- Uses a combination of signature based, advanced heuristic and AL/ML technologies to provide complete protection for both known and emerging threats.
- In-depth monthly reporting.

3

## EXCEPTIONAL DELIVERABILITY

- Ensures business critical, transactional and commercial email reaches mailboxes.
- High reputation delivery nodes across Australasia.

## WHAT OUR CUSTOMERS ARE SAYING

"We looked at other email security providers but chose SMX due to their cost structure, higher catch rate, ability to send clean outbound email and the fact they're local. With SMX 365 we saw an uplift in catch rates of 15,000 emails per week and on our volume that's huge."

# Microsoft Azure | Security | SMX 365

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### **BE FUTURE-READY**

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### **BUILD ON YOUR TERMS**

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### **OPERATE HYBRID SEAMLESSLY**

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

### **TRUST YOUR CLOUD**

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
