CLOUD UNIFY

Simplifying the management of multi-cloud account access by Unified dashboard.

Single Identity for Each AWS Account Access.

No need to create separate user credentials of each Developer/IT Admin for each AWS Account.

Easy Off-Boarding

You need to remember which team member was given access of which AWS Accounts, when he/she leaves. Just do single click and disable user.

100% Data Security

We don't preserve your account credentials anywhere.

Integration made easy with Dedicated CIO

Our CIO helps you to integrate your AWS Accounts, ensuring easy on-boarding.

aws
