Make your Data Ready with Microsoft Fabric and Azure

Accelerate your Microsoft Fabric Adoption Journey

Microsoft Fabric is an end-to-end analytics solution that can help organizations of all sizes to make better decisions with their data. Fabric provides a unified platform for data movement, data storage, data engineering, data integration, data science, real-time analytics, and business intelligence.

- Enable Seamless integration between multiple workloads.
- Empower technical teams as well as business professionals to do more.
- Leverage AI powered copilot features, make teams productive
- Empower your teams with tools to build AI solutions
- Accelerate time to value from your data.

Features

- **Unified platform:** Microsoft Fabric provides a single platform for all your analytics needs, which can help to establish a single source of truth, simplify your data infrastructure and manage costs.

- **Scalable and secure:** Microsoft Fabric is built on Azure, the world's leading cloud platform, which provides the scalability, security, and compliance that organizations need to manage their data.

- **AI-Powered:** Microsoft Fabric is a low-code/no-code platform, and with the addition of Copilot, it makes it easy for business users and analysts to accelerate development and deploy analytics solutions without having to be experts

- **Comprehensive Analytics:** Microsoft Fabric includes a wide range of features and capabilities, which can helporganizations to address a variety of analytics challenges.

SNP helps you unlock transformative value with Microsoft Fabric. We guide you through every step of your Microsoft Fabric adoption journey, ensuring a seamless and effective integration tailored to your specific needs

Engagement Deliverables:

- Technical deep dive session on Microsoft Fabric
- Proof-of-concept deployed on Dev environment
- Technical Documentation

Next steps:

- Roadmap for establishing analytics platform on Microsoft Fabric

Solution Workloads

Your Proof of Concept will include two or more of following workloads:

- Data integration from sources
- Data Engineering
- Data Warehousing
- Business Intelligence and Reporting
- Real-time analytics
- Data Science
- Data Activator

Microsoft Fabric: The data platform for the era of AI

Accelerate your Microsoft Fabric Adoption

Our engagement includes a comprehensive roadmap to build and operationalize your data platform with Microsoft Fabric

Our expertise in Microsoft Fabric includes cross-domain knowledge of networking, security and governance, applied from the outset to ensure your data remains secure and compliant throughout the platform.

In addition to our core offering, we provide a suite of services designed to strengthen your solution and make it enterprise-ready. Our comprehensive services include

- **Governance:** Implement strong governance practices to ensure data security, compliance, and integrity.

- **DataOps:** Enhance data operations with efficient processes and automation for seamless data management.

- **FinOps:** Optimize financial operations to manage costs and drive value from your cloud investments.

- **Infuse AI:** Integrate advanced AI capabilities to unlock new insights and drive innovation.

- **Managed Services (On-going Support):** Receive continuous support and maintenance to keep your platform running smoothly and efficiently.

Our collaborative approach ensures we work together requiring a joint team effort to deliver results to your business. We aim to empower your team with the knowledge and skills to extend, enhance, and maintain your Fabric solutions.

Are you looking for:

- **Development with Microsoft Fabric –** Establishing end to end unified analytics platform with Microsoft Fabric

- **Hybrid Implementation –** Extending your current platform with Microsoft Fabric features and capabilities

- **Migration –** Migrating from your existing platform to Microsoft Fabric

- **Integrating Services –** Integrating industry-leading platforms such as Dataverse, Azure Databricks, Snowflake, and Amazon S3 with Microsoft Fabric for enhanced analytics

- **Power BI Premium to Fabric –** You have Power BI Premium, and wanting to leverage the Fabric capabilities

We will engage with you to build a future ready analytics platform, contact us at SNP Technologies

About SNP Technologies Inc.

SNP's consulting services help businesses of all sizes transform with innovative, cloud-based solutions that harness the power of Microsoft Azure.

We combine elements from our ISO certifications and Microsoft specializations as well as the most efficient and innovative technology tools and platforms to help our clients become more agile, more customer focused and more operationally efficient.
