Cloud Architecture Optimization Assessment

Improve cloud efficiency and maturity.

# As cloud journeys progress, IT leaders face the following barriers:

Low visibility

Lack of real-time visibility across consumption sources to manage and forecast spend

Low cloud-focused knowledge

Inadequate cloud skills to pinpoint cloud waste and translate findings into actions
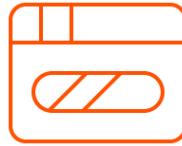

Inefficient architecture

Architecting environments using on-premises approaches leads to unnecessary spend and poor results

Inability to deploy optimal scenarios

Infinite ways to operate environments make it difficult to configure deployments for peak efficiency

Fully-funded Cloud Architecture Optimization Assessment

Cloud Architecture Optimization Assessment is a data-driven assessment that evaluates cloud architecture against the well-architected framework (best practices from leading cloud providers) to create a plan to improve cloud maturity.

Our assessments help IT leaders build solid business cases by showing them exactly how much they can save by implementing our recommendations.

The Cloud Architecture Optimization Assessment experience

Get recommendations

- Data analysis offers personalized recommendations to improve inefficiencies

Execute

- Softchoice's planning, implementation and managed services are available to support your transformation efforts

1   **2**   **3**   **4**   **5**

Gain insights

- Automated scan of live environment using non–intrusive tools
- Optional questionnaire
- Analyze insights to benchmark cloud framework against best practices

Translate findings

- Experts help translate recommendations into a prioritized actionable roadmap
- Recommendations with quantifiable outcomes are provided in detailed reports

Review progress

- Evaluate progress on recommendations
- Address ongoing challenges to improving efficiency

Softchoice

Benefits of choosing a Cloud Architecture Optimization Assessment
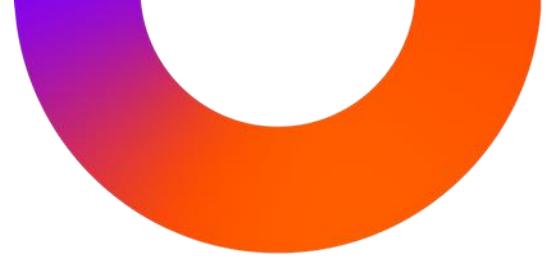

Visibility
Get deep insight into your cloud stack within a single pane of glass

Predictability
Implement best practices from leading cloud providers proven to show results

Efficiency
Eliminate unnecessary spend and surprises in cloud bills

Success
Ensure consistently great experiences with reliable, resilient, and secure cloud operations
