

A man with a beard and mustache, wearing a blue denim shirt, is smiling and looking at a laptop screen. The background is a blurred indoor setting with a plant and a window. A large orange and purple diagonal graphic is overlaid on the right side of the image.

Teams Phone Pilot

Fast-Track your PSTN calling capabilities with Ready-to-Deploy
Teams Phone Services

Challenges

Lengthy Time to Go Live

Attempting to pilot-test a Teams calling service without expert assistance could result in delays and a prolonged timeline for deployment.

Integration Hurdles

Establishing a calling PSTN infrastructure on your own can introduce a variety of complications, which could disrupt existing systems and result in calling issues and inefficient processes.

Lack of Technical Support

Absence of expert guidance can lead to issues going unresolved or being poorly managed, causing unnecessary delays and affecting the overall efficacy of the implementation.

Stressful, Time-Consuming Transition

Navigating the technical intricacies of setup and migration without skilled help can become a significant time sink and source of stress. Instead of focusing on testing the pilot, you'll be burdened with troubleshooting and ironing out kinks in the system.

Customer Value

Accelerated Deployment:

With an integration timeline of just 2 business weeks, businesses will have instant access to the latest Teams calling services for up to 90 days and 50 of their users, to pilot-test a Teams modern communication infrastructure.

Seamless Integration:

From PSTN connectivity to Microsoft 365 Calling Plans, Operator Connect, and even Teams Phone Mobile services, customers will experience a frictionless integration process tailored to their specific business needs.

Expert Support:

Our team of experts will facilitate a smooth and efficient transition process, providing full support at every step of the way.

Expert-Led Transition, Zero Hassle:

Led by our Microsoft Certified Technical Engineers, our experts handle the intricacies of setup, freeing you from the complexities and saving valuable time. Experience a smooth transition with minimal disruption, allowing you to concentrate on the pilot testing without added stress.

Teams Phone Pilot Quick Start

Teams Phone Pilot Quick Start

Fast-Track your PSTN calling capabilities with Ready-to-Deploy Teams Phone Services

Unlock the next level of business communication with Softchoice's Teams Phone Pilot Quick Start —a comprehensive core enablement and introduction to advanced telephony solutions using Microsoft Teams Phone Calling Services.

Enable Microsoft Teams PSTN calling feature.

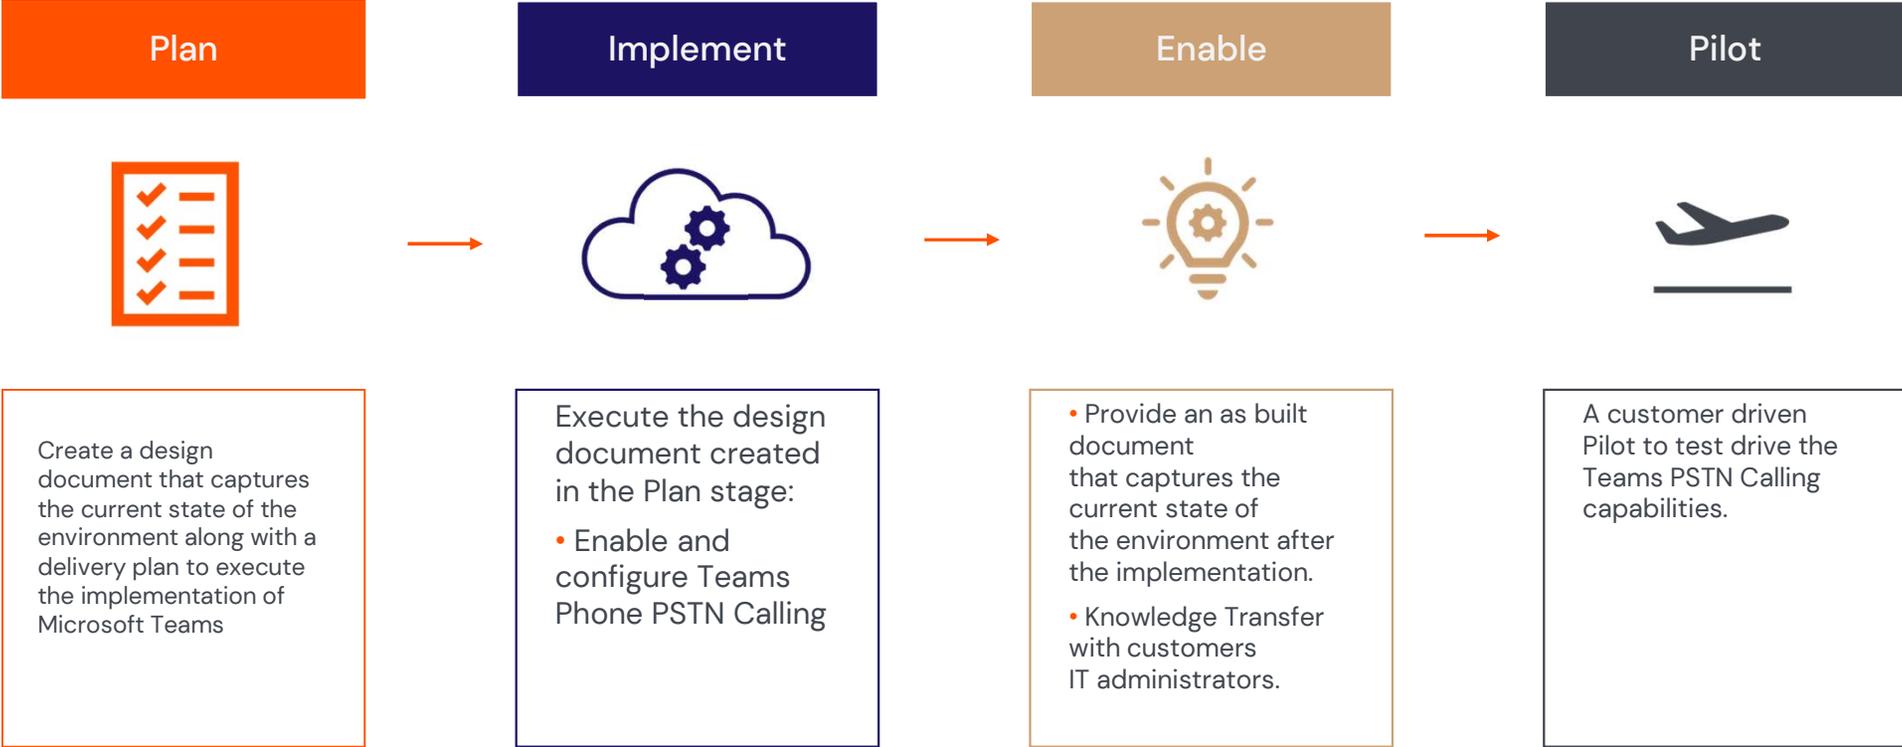

Available for up to 50 users, pilot the latest calling features and capabilities Microsoft Teams has to offer with hands-on experience in your Microsoft 365 production tenant.

Take advantage of cutting-edge telephony features, and maximize your organization's investment of Microsoft 365 services

Our approach is thorough, and our experts are ready.

Next steps

1. Conduct a discovery of your current Microsoft E3/E5 tenant
2. Evaluate licensing requirements
3. Review the discovery with a Softchoice Journey Architect to strategize a plan of action for implementation of the Exchange Online and Microsoft Teams Collaboration Pilot Offer
4. For more information on Softchoice
