

Softel Phone System Admin for DID Provisioning in Teams Phone: 2-hr Briefing

With Microsoft Teams Phone, organizations realize that they can simplify enterprise communication. And because it's part of Microsoft 365, organizations also get to combine unified communications with teamwork capabilities, enabling people to call, chat, meet and collaborate from a single solution.

While the benefits are clear, businesses find it challenging to switch from their existing telephony solution and embrace the promise of the cloud.

Reduce the chaos of Teams Phone management with Softel Phone System Admin

According to a survey by Akkadin Labs, IT teams spend up to 24% of their time provisioning users. Softel Phone System Admin, significantly reduces the effort, enabling you to provision users across Microsoft Calling Plans, Direct Routing, or Operator Connect in hours instead of weeks or months, without requiring the use of any Power Shell scripts.

Accelerate user provisioning

Make the process 98.5% more efficient through bulk uploads and automation and also, easily manage calling policies on a user or group level

Get greater visibility into voice assets

Stay on top of your phone number distribution, and all the recent changes to your Teams Phone tenant(s)

Enable rich call quality management

Provide the business teams advanced call quality analytics in an easy-to-visualize format, without having them access the Teams Phone admin

Streamline security audits

Track even the smallest of the changes at a user, group, or policy level and preserve the log for up to 7 years to meet the most stringent compliance requirements

Take the next step: Sign-up for a 2-hr briefing

Get a custom demo to learn how Softel Phone System Admin can reduce your user provisioning cost and time and help you quickly unlock the value of cloud communications.

For more than 25 years, Softel has been driving innovation in communication solutions with its continuously expanding portfolio of services and partners
