softeng Max®

Softeng Max Accelerators
For the fastest and most secure digitization of your company

Accelerators

Softeng Max Accelerators are packaged implementations by our experts ready to deploy in your organization, designed to provide value faster, with warranty and maintenance, saving time and money.

⌐ **Exclusive for Platinum customers** through Protection and Progressive Digitalization coverage.

⌐ **Deployment by our experts** in a first group of selected users (digital Leaders), devices or servers, validating their operation and achieving solid adoption.

⌐ **Saving IT time**, that you only have to take care of activating it progressively to the next group of users or devices you select.

Progressive digitalisation

In the field of digitalization, our accelerators help automate and adopt a data-based culture, providing organizations with a powerful and modern analytical platform.

Only for Platinum customers, this service allows you to promote improvements in data processing and intelligence that may be relevant and of interest to achieve business objectives.

At Max Digital Workplace, our accelerators will help you in the digitization and automation of processes. On the other hand, at Max Intelligent Cloud we focus on helping to adopt a data-based strategy, providing an analytical platform to carry it out and accompany the organization in the cultural change that involves adopting a decision model based on quantitative quality criteria.

As a final result, it will enhance digitization and data in the organization to be able to continue advancing safely.

Discovery Workshop
Copilot for Microsoft 365

softeng Max®

Maximize the potential of Generative Artificial Intelligence.

Generative Artificial Intelligence is a disruptive change that can help companies optimize their operations and create new products and services, thus gaining a competitive advantage.

Find out how to do it in your organization thanks to our Workshop on discovering this technology, defining strategies and identifying opportunities.

Discovery Workshop Copilot for Microsoft 365

WORKSHOP: GENERATIVE ARTIFICIAL INTELLIGENCE, AIMED AT MANAGERS AND BUSINESS MANAGERS

The objective of the workshop is for the people responsible for the organization's business to obtain a clear vision of the strategic importance of generative Artificial Intelligence, and to understand how this technology can benefit the digitization and automation of business processes.

What will be explained?

- The new era of Artificial Intelligence.
- The differences between specialized AIs and generative AIs.
- Where generative AI fits into the business and what are its main applications.
- How generative AIs work.
- What risks we should take when using them and how we can mitigate them.
- How should we approach the incorporation of this technology in our organization?.
- Review of common use cases and use cases relevant to your business.
- Why it's important to have a strategy on using AI and how to get started
- Recommended steps to adopt this technology immediately by users.
- Question Time.
