

# SATT PLATFORM<sup>®</sup>: Enterprise-Grade Serialization, Aggregation, and Compliance Powered by Microsoft Azure

## What we offer

SATT PLATFORM<sup>®</sup> is an enterprise-grade, cloud-based solution tailored for pharmaceutical serialization, aggregation, and traceability. Built on Microsoft Azure, it ensures unmatched scalability, security, and compliance for all stakeholders, including:

- Marketing authorization holders (MAHs)
- Single-site manufacturers (SSM)
- Multinational pharmaceutical organizations (MPOs)
- Parallel importers (PIs)
- Contract manufacturing organizations (CMOs)
- Third-party logistics wholesalers (3PLs)

## Key Features and Benefits

- **Effortless Serialization and Aggregation:** Generate unique serial and aggregation numbers for full traceability.
- **Seamless Data Exchange:** Ensure secure and reliable data sharing with internal and external stakeholders.
- **Streamlined Production Management:** Optimize serialization and aggregation processes to improve visibility and reduce manual efforts.
- **Secure Regulatory Communication:** Enable real-time, bidirectional reporting with national and international authorities.
- **Advanced Reporting Capabilities:** Generate customized internal and external reports in multiple formats for complete compliance.

# Why Choose SATT PLATFORM®?

## The Benefits for Your Business:

### Regulatory Communication

Secure connection and reporting to the respective National Systems. The SATT Platform is an accredited software solution that meets the complete compliance requirements for a wide array of partners. The solution is being regularly updated to reflect ongoing regulatory changes and aggregates all compliance-related information in a single place.

### External Network Communication

Communication with partners and existing systems. The SATT Platform provides full visibility of the supply chain, including coverage of marketing authorization holders, parallel distributors, contract manufacturing organizations and third-party logistics wholesalers, going all the way to the distribution of final products.

### Enterprise Management

Planning and monitoring of serialization and aggregation processes on the plant level. SATT PLATFORM® EBR provides efficient data management, starting from the planning to monitoring of serialization and aggregation processes on the plant level.

### Traceability Web Machine

Aggregation, verification, and label template design. The solution provides aggregation and verification, as well, it allows label template design.

- Intuitive User Interface: Simple, multi-language setup for seamless usability.
- Global Compliance Assurance: Manage multi-market compliance effortlessly with stable, regulation-ready updates.
- Flexible Reporting: Generate unlimited, customized reports tailored to enterprise needs.
- Secure and Scalable Data Exchange: Automatic and reliable integration with partners' systems.
- Future-Proof Connectivity: Maintain stable, downtime-free operations during regulatory changes.

## Customer Feedback

“ The SATT PLATFORM has allowed us to align with stringent industry standards, providing a robust foundation for maintaining trust and transparency in our operations. Its scalability ensures that our business can grow seamlessly while maintaining the highest level of efficiency and security. ”

*Biser R. Georgiev, Executive Director
