

Application Modernization with Azure & PowerApps

Enable Your Workforce with Custom Solutions

WHAT'S INCLUDED

Softlanding's App Modernization Workshop is a two-day engagement that will cover the benefits of Azure and PowerApps, and highlight the services that will light up your applications. We will then guide you through the process of reviewing your existing application and mapping it to Microsoft cloud services.

At the end of the workshop you will have a high level architectural design and road-map for implementing your application on Azure and PowerApps.

- > **OVERVIEW OF AZURE PAAS SERVICES**
- > **OVERVIEW OF POWERAPPS**

OVERVIEW

Modernize Your Apps in the Cloud

Get the most value from modernizing existing applications to meet your current and future business objectives. Application modernization aims to make your legacy systems more agile and efficient through the use of Cloud technology, intelligent automation, and streamlined processes so you can focus on your business.

Built on Microsoft Azure and PowerApps, modern application development can leverage cloud technologies to focus on the best solution without having to worry about the underlying infrastructure.

KEY BENEFITS

SECURITY

Maintain Microsoft level security by building an application in Azure and PowerApps, moving data as needed

AVAILABILITY AND SCALABILITY

Azure provides high availability and redundancy and can easily scale up or down resources within minutes so you don't have to worry about capacity constraints.

FASTER TIME TO VALUE

Application Modernization that leverages Azure and PowerApps can quickly replace business functions currently served by aging platforms
