

# Azure Arc Consultation

Azure Arc is a feature-rich solution that extends Azure management and effectively enables Azure services to run across on-premises, multi-cloud, and edge. Noventiq helps advice businesses to implement and optimize the Azure Arc for their specific needs.

## The Problem

Many organizations, post the creation of services and applications, find it extremely difficult to operate in various data centers, and on multi-cloud.

Do you face below mentioned challenges?

- **Challenge 1: Location constraints in building native apps**
- **Challenge 2: Edge computing complexity**
- **Challenge 3: Compliance challenges**
- **Challenge 4: Security concerns**
- **Challenge 5: License scalability concerns**

**Why Choose Noventiq for Azure Arc consultation?**

- **Our specialists have extensive hands-on experience optimizing Azure environments.**
- **We provide tailored recommendations as per your unique environment.**
- **Harnessing the highly sought-after tool for simplifying governance and management of your Azure environment.**
- **Use of cloud best practices for enhancing the security of your infrastructure.**
- **Offering timely assistance through each phase of implementation.**

## The Solution

**Build a wide range of applications and run it easily on edge, and multi cloud by Noventiq's offering!**

**This trailblazing offer focuses on guiding the organizations to utilize the potential of Azure Arc for their specific requirements.**

**It will help you to get guidance on connecting and managing varied resources seamlessly.**

**The consultation also helps in enhancing flexibility, scalability, and efficiency in managing hybrid infrastructures through Azure Arc.**

## Key Features

 **Complimentary service**

 **Allows to utilize the potential of edge computing**

 **Enablement of ESU licenses on EOL/EOS servers seamlessly.**

 **Ensure compliance standards**

 **Enforce security measures**

 **Enhances overall data protection**

 **Simplifying the edge computing**
