

# Get Clarity Across Your Data & Stay DPDP-Compliant with Noventiq

## OVERVIEW

Many organizations struggle with execution, not intent—personal data is scattered across platforms, and compliance remains manual and hard to audit. Noventiq simplifies DPDP compliance by embedding privacy and security controls into everyday operations using native Microsoft Security and Compliance tools, translating DPDP requirements into clear, auditable controls that reduce risk, strengthen governance, and build a defensible compliance posture.

## HOW WE SIMPLIFY DPDP COMPLIANCE FOR YOU

### DPDP Readiness & Risk Assessment

We begin with an assessment of DPDP readiness across people, processes, and technology, followed by the discovery and classification of personal data using Microsoft Purview. This is complemented by a detailed gap analysis mapped to DPDP obligations, culminating in executive-level findings and a clear, actionable remediation roadmap.

### Governance & Compliance Design

We establish a DPDP-aligned data governance and privacy framework, clearly defining accountability roles such as Data Fiduciary, Data Processor, and internal owners, while outlining a robust consent, retention, and data lifecycle strategy supported by a Microsoft Security & Compliance reference architecture.

### Control Implementation on Microsoft Stack

Our solution configures Microsoft Purview for data classification, labeling, retention, and lifecycle management, strengthens identity and access governance with Microsoft Entra, enables data protection through Microsoft Defender, and delivers centralized monitoring and automation using Microsoft Sentinel.

### Operate & Monitor

The engagement delivers compliance dashboards and reporting with continuous monitoring aligned to DPDP expectations, ensures incident and breach response alignment, and includes operational runbooks along with structured knowledge transfer to support ongoing compliance.

## KEY BENEFITS

- DPDP Act-specific alignment for the Indian regulatory environment
- Native integration with Microsoft Security and Compliance ecosystem
- Structured delivery with measurable, audit-ready outcomes
- Reduced manual effort through automation and centralized governance
- Improved visibility into personal data and associated risks
- Practical implementation rather than theoretical compliance models

## ENGAGEMENT MODEL & DURATION

Fixed-scope or phased consulting engagements

Typical duration: 8–12 weeks depending on scope and complexity

Collaborative delivery with IT, security, privacy, and compliance teams

Optional transition to advisory or managed compliance support

## WHY CHOOSE NOVENTIQ

With Noventiq, you gain a partner who goes beyond design to deliver measurable business impact.

30+ years of experience helping enterprises evolve complex IT environments

Deep expertise across data, AI, cloud, and security solutions

A business-first approach focused on ROI and real-world adoption

Recognized with the CIO Choice Award 2026 (AI category)

## FREQUENTLY ASKED QUESTIONS (FAQS)

- **Does this service provide legal advice on the DPDP Act?**  
No. This service focuses on technical, governance, and operational enablement. Legal interpretation and advice are not included.
- **Is this service only for Microsoft customers?**  
This service is designed for organizations with significant Microsoft 365 and Azure usage. Hybrid and multi-cloud environments are supported where Microsoft controls are in scope.
- **Will this make us fully DPDP compliant?**  
The service implements DPDP-aligned controls and governance mechanisms. Final compliance depends on organizational policies, legal interpretation, and ongoing adherence.
- **Can this support DPDP audits or regulatory reviews?**  
Yes. The engagement is designed to produce auditable controls, documentation, and evidence aligned with DPDP expectations.
- **Is ongoing support available after implementation?**  
Yes. Optional operate-and-monitor services are available to support continuous compliance and posture management.
- **Can this be delivered in phases?**  
Yes. The offering supports phased execution based on organizational maturity and priorities.
