

# Build the Data Foundation Your AI Strategy Needs with Noventiq's Open Lakehouse Modernization Offer

Today's enterprises are generating more data than ever, yet insights are often slowed by disconnected platforms, duplicate pipelines, rising costs, and complex governance. If you're running Snowflake alongside Microsoft Fabric or planning to, your teams may be spending more time moving, reconciling, and securing data than using it to drive decisions.

Noventiq's **Open Lakehouse Modernization** offer helps you unify your Snowflake data estate with Microsoft Fabric's OneLake to create a single, governed, data foundation.

## THE HIDDEN BARRIERS BETWEEN YOUR DATA AND REAL INSIGHTS

- 

Multiple copies of the same data across platforms
- 

Separate pipelines for analytics, reporting, and AI
- 

Inconsistent governance and access controls
- 

Rising cloud and data processing costs
- 

Slow time to insight for business users

## TURN DATA INTO AN AI-READY BUSINESS ASSET WITH A UNIFIED OPEN LAKEHOUSE

Noventiq enables a modern **open lakehouse** where Snowflake and Microsoft Fabric work together as one ecosystem. We help you design and implement a shared data foundation where

- Snowflake data is made accessible in OneLake
- Microsoft Fabric engines (analytics, data science, warehousing, BI) can work on the same data
- Security and governance are unified
- Business users can consume insights through Power BI and Copilot

### WHO IS THIS FOR?

- Enterprises already using Snowflake or planning to adopt it
- Azurefirst or hybrid / multicloud organizations
- Teams struggling with duplicate pipelines and rising data costs
- Businesses facing governance gaps across platforms
- Leaders who want to operationalize AI on trusted, governed data

## WHAT YOU GAIN

1

**One trusted data foundation that** reduces inconsistencies, increases confidence in reports and dashboards, and cuts the time teams spend reconciling numbers.

2

**Faster insights across teams** through a shared data layer that shortens time to insight and accelerates experimentation and innovation.

3

**Simplified governance and security** with centralized controls that strengthen compliance, and reduces data-leak risk.

4

**Lower total cost of ownership** by eliminating redundant pipelines and data movement, resulting in lower cloud costs and better ROI from existing platforms.

5

**AI-ready data at scale** that enables faster AI deployment, more reliable outcomes, and a sustained competitive advantage from data-driven intelligence.

### Assessment & Strategy

- Inventory Snowflake workloads and data sources
- Identify analytics, reporting, and AI use cases
- Assess interoperability readiness
- Build ROI and cost optimization scenarios

### Optimization & Monitoring

- Query and performance tuning
- Capacity and cost governance
- Monitoring, logging, and alerting
- Operational runbooks and SLAs

### Architecture & Design

- One Lake based data foundation blueprint
- Unified security and governance model
- Cross platform data access design
- Workload flow mapping

### Analytics & AI Acceleration

- Power BI dashboards and data products
- Copilot and AI usecase enablement
- Cross engine analytics workflows
- Business user training for selfservice insights

### Implementation & Enablement

- Configure Fabric and OneLake environments
- Enable shared data access between Snowflake and Fabric
- Build governance policies and catalogs
- Create reusable pipelines and BI assets

## NOVENTIQ: YOUR PARTNER IN TURNING DATA STRATEGY INTO BUSINESS OUTCOMES

With Noventiq, you gain a partner who goes beyond design to deliver measurable business impact.

30+ years of experience helping enterprises evolve complex IT environments

Deep expertise across data, AI, cloud, and security

A business-first approach focused on ROI and real-world adoption

Recognized with the CIO Choice Award 2026 (AI category)

### Recognized by Microsoft as a trusted Fabric partner, including

Microsoft Fabric  
Featured Partner

Fabric Featured Partner for  
Real-Time Intelligence

Fabric Databases  
Featured Partner
